nuVizz – Official Consulting Partner of Manhattan Associates

nuVizz has a consulting practice focused on implementing Manhattan Associates solutions. We have a number of resources experienced in implementing both iSeries and Open Systems based solutions. nuVizz is an official consulting partner of MA.

PROJECT/PROGRAM MANAGEMENT

Program management is the key to delivering an organization's strategy. Strategic Transformation typically requires multiple, inter-dependent projects taking place concurrently. nuVizz can provide an assortment of services and expertise to ensure cost-effective, compliant and efficient execution of programs/projects. Beyond our methodology and framework, we apply our communication and soft skills, resulting in highly coordinated program achievement.

Application Modernization Services

Over the years, businesses have invested considerable resources in building applications invaluable to the business. Yet today, many businesses face the challenges of outdated and inefficient applications using unsupported technology. Apart from being expensive to maintain, businesses are losing their competitive edge as a result of such legacy applications. As such, businesses are looking for cost-effective ways to improve the architecture, usability, and performance of their existing applications thus avoiding the risk of losing the embedded intellectual assets and protecting the investments in such applications. nuVizz can partner with the clients and help them with their modernization efforts in the following areas –

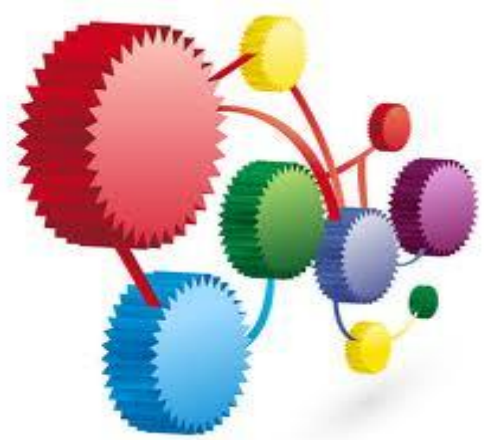

- Application Portfolio Analysis
 - Evaluation of the costs, risks, constraints and value of the existing technology components
 - Technical analysis and categorization of applications based on business processes, key performance indicators and geographies
 - Identify and prioritize opportunities and options for application transformation that are aligned with the IT strategy
 - Assist in defining a modernization roadmap
- Application Modernization Implementation
 - Application re-architecting, optimization and documentation
 - SOA Design, development and deployment

ENTERPRISE INTEGRATION SERVICES

In today's world, improving business efficiencies, driving up market share, and achieving business results depend on efficient deployment of technology and application infrastructure within and across the enterprise. nuVizz can assist by providing end-to-end services in the following areas –

- Evaluation
 - Defining Integration Strategy and the Roadmap
 - Assessment, Validation and Benefit analysis of various technology solutions
 - Selection of Integration Product and Framework
- End-to-end deployment
 - Framework Design
 - Configuration support
 - Design and Development of the Legacy application integration layer
 - Deployment of packaged and customized adapters
- Migration and Upgrade of existing Integration Product and infrastructure

SUPPORT SERVICES

Over the years, the role of IT in an organization has changed from a business support function to a business service provider function. Keeping the Technology investment operating at maximum efficiency is vital to all businesses. Technology-related problems can result in downtime thus impacting productivity, not to mention tie up IT staff. nuVizz can provide a service portfolio that offers -

- Remote, 24x7 software technical support
- Access to product specific expertise. These resources can assist with resolution of individual problems as well as provide guidance about the application usage
- Add-on services like
 - Single point of contact
 - On-site support services
