OnRamp Brings High Tech Happy Hour to Raleigh

AUSTIN, TX – OnRamp, an industry leading high security and hybrid hosting solutions provider with data centers in Austin, TX and Raleigh, NC, has announced today the company will expand its very popular High Tech Happy Hour to Raleigh, North Carolina. The event, which has been successful in Austin, TX, where OnRamp's corporate office is headquartered, will take place at The Rockford on Thursday, August 14th, from 5:30-8pm in Downtown Raleigh. With co-sponsorship from OnRamp's healthcare industry compliance partner, CompliancePoint, the event will bring together technology professionals from the Raleigh-Durham-Chapel Hill, representing multiple industries, for a night of networking.

In February of 2013, OnRamp opened a data center facility in the heart of Research Triangle Park (RTP), the epicenter of the Raleigh-Durham-Chapel Hill area and a hub for tech and HealthIT innovation. OnRamp's expansion into the Raleigh market was to meet the growing demand for the company's data center services. Like OnRamp's two Austin data centers, the company's Raleigh data center is an SSAE 16 SOC I Type II, HIPAA and PCI compliant facility featuring the highest levels of security, redundancy, reliability and infrastructure.

"Raleigh, like Austin, is a city filled with companies and entrepreneurs on the cutting edge of technology innovation," said OnRamp President Ryan Robinson. "We are pleased to host an event that will unite the tech community for an evening of networking to help foster business relationships." Several members from OnRamp's leadership and technical teams will be in attendance to discuss how the company can help build secure, hybrid computing solutions built on colocation and managed hosting services.

For additional details and to register for this event, visit: <http://onr.com/happyhour>

About OnRamp

OnRamp provides computing infrastructure for companies that require high levels of security and availability. As an SSAE 16 SOC I Type II audited, PCI Level 1 and HIPAA compliant company, OnRamp operates multiple enterprise class data centers to deploy hybrid solutions built on cloud-delivered computing capacity, managed hosting and colocation services. OnRamp specializes in working with companies to ensure compliance in the healthcare, financial services and other industries with high security needs, helping them meet the rigorous compliance requirements associated with HIPAA, PCI, SOX, FISMA and FERPA.
