

Features:

- In wall mount
- Low sound levels <47Db
- Plastic Grille with metal chassis
- Chassis designed to fit between standard 16" O.C. Stud spacing for easy retrofits
- R134A Refrigerant
- ETL listed
- Tamper proof grill screws

- Built-in digital humidistat insures efficient operation
- 10' removable cord and condensate hose provided for easy installation and hardwire & plumbing applications
- Automatic restart in the event of power outage
- ON/OFF switch and humidity level controls are hidden behind the grill.

Today's energy code requirements have made our apartments, condominiums and homes much "tighter" with respect to air movement in and out of a home. Most current HVAC designs only address temperature, left uncontrolled, the moisture buildup within a home (humidity) will climb to levels that make it uncomfortable to live in, like the air on a humid summer's day.

In addition to being uncomfortable, the increased moisture levels within the home help to create a perfect environment for **MOLD** to grow.

The **IW25-1** was designed to help reduce the amount of moisture in a home quietly, inconspicuously and inexpensively. The on/off switch and electronically controlled humidistat are located behind the wall grill which is secured with tamper proof screws to eliminate un-authorized manipulation. Once the Humidistat is set to the desired % of relative humidity, the unit will cycle on and off as required to satisfy your setting.

With the ability to remove up to 25 pints per day of water from the air, the IW25-1 is the perfect dehumidifier to inexpensively make your home's air dryer while being quite and inconspicuous.

EVERYDAY!!*

- Inexpensive
- Quiet
- Inconspicuous

For New Construction & Retrofit Applications

Who Will Benefit From This Product?

Property Owners that have experienced:

- Condensating windows
- Damp, humid apartments / homes
- Mold
- Stains on window sills

Vacation Home Owners

Hotel / Motel Operators

What Benefit Will The User Of This Product Experience?

- Reduction in levels of Humidity (Water) in the home.
- More comfortable living environment due to reduced relative humidity levels.
- Reduction in condensation formation on windows during certain times of the year.
- Reduction in opportunity for mold to grow on wall surfaces due to reduced relative humidity levels.
- Saves \$ on air conditioning bills.

Why Is This Product Better Than A Portable Dehumidifier You Can Buy At The Local "Do-It Yourself" Store?

- Once installed it is out of the way and inconspicuous.
- Quieter than most portable brands thus not a bother to the resident.
- Drains to plumbing so emptying is not required.
- Tamper proof so tenants can't turn it off.
- Automatically turns on & off as needed.
