Lippert Extrusion chooses Granco Clark's Flying Cut Double Puller to replace a single puller.

Belding, MI – Lippert Extrusion of Elkhart, Indiana has selected Granco Clark to supply a Flying Cut Double Puller to replace a single puller on press 3 in their Elkhart Indiana extrusion facility.

Lippert was searching for a complete puller solution including, cut on the fly, cut on the weld mark, even lengths, better cycle times and uptime improvements. Granco Clark provided all the above with their flying cut technology. Lippert has seen vast improvements in profile quality, reduced scrap rates and superior operation.

Founded in 1947, Granco Clark began manufacturing billet furnaces and has evolved into a worldwide, cutting-edge, single-source supplier and leading equipment manufacturer in the aluminum extrusion industry.

With a proven track record of manufacturing the most dependable and durable equipment in the business, Granco Clark continually develops groundbreaking technology to improve its products – ranging from billet log furnaces, hot log saws, FusionBond™ to age ovens and stacking equipment.

The company was the first to introduce the integrated control system technology that has since developed into SCSExtrude – the next-generation technology for optimizing automated extrusion line performance.

Another key to Granco Clark's success is listening to customers and designing products for their specific needs. The end results are improved productivity, energy conservation, waste reduction and cost savings for customers.
