

DataWave was founded by email and archive experts to help companies reduce the time, effort and complexity associated with extracting, ingesting, and converting electronic information. **DataWave's flagship product PAMM is the industry leader in email archive migration.** PAMM is developed on the Microsoft .Net platform and designed to be the most efficient product in the industry for moving data.

PAMM is the first 100% software based product for automating Email Archive Migrations. DataWave is capable of moving from any email archive platform (including Autonomy and HP products – **EAS Zantaz, EMC EmailXtender, IAP, RISS, and Nearpoint**) to **Enterprise Vault and EV.Cloud**. DataWave automates the .PST process to generate custom file sizes for EV.Cloud migrations. **Pay for only the data you want migrated. Pricing based at actuals.**

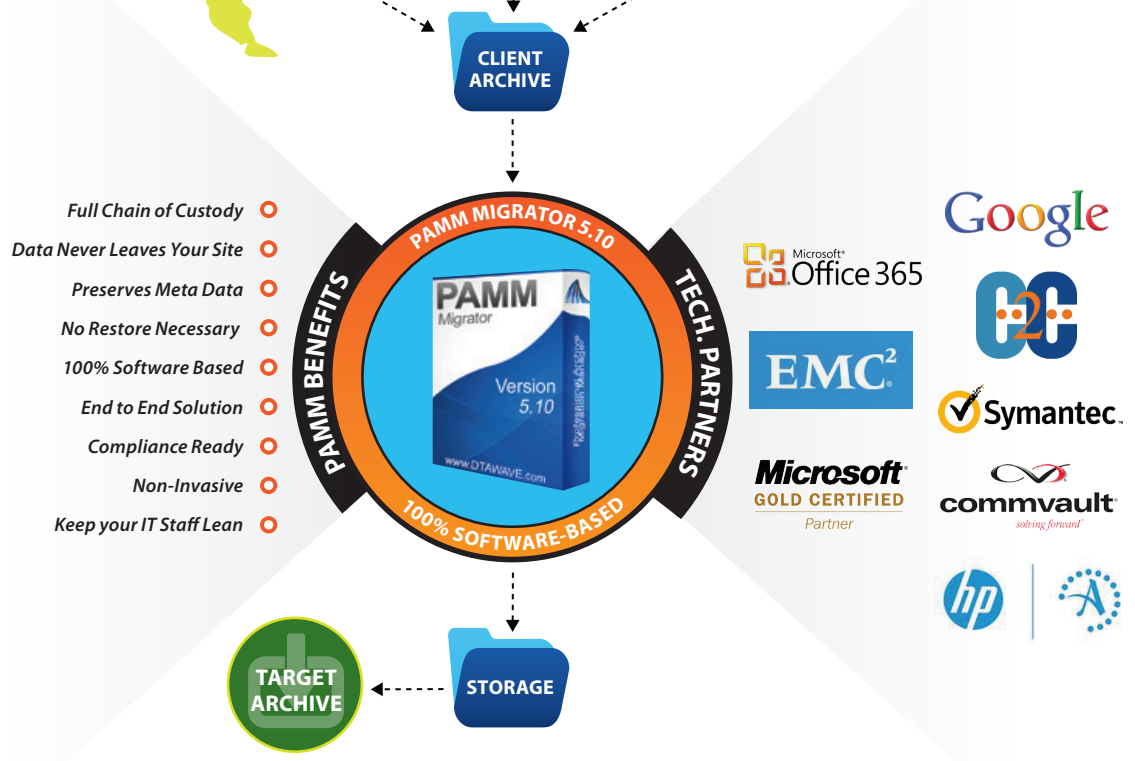

PAMM SOFTWARE REQUIREMENTS

- All PAMM Related Servers**
 - Microsoft Windows Server
 - Microsoft .Net
