

Instantly Boost
Storage Space

No Noticeable
Performance Impact

Supports RAID Setups

Works on SSD and
Mechanical Drives

Attains Very High
Compression

Based on WIMBoot
Technology

Preserves System
Security on All Files

Transparently Access
all Apps and Data

Multi-Threaded and
Load-Balanced

Safe and Reversible
Compression

"While the pre-compression estimate showed a potential space savings of about 19GB, I ended up saving about 43GB.

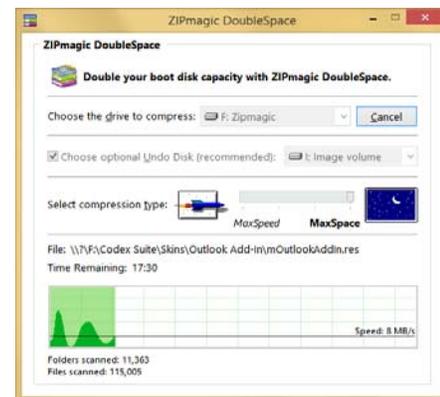

I am delighted with the results...we have gone from having 18% free space, which is potentially problematic, to over 37%, which is comfortable."

Jeffrey A. Mirus, Ph.D.

ZIPmagic DoubleSpace

*Double Your Disk!
Ideal for Tablets, SSDs,
and All Boot Drives.*

ZIPmagic DoubleSpace **doubles your boot disk capacity**. Access to compressed data is completely transparent – all of your installed applications run normally, and all of your files remain fully accessible as if they were not compressed at all. **DoubleSpace runs on 32 bit and 64 bit Windows 8.1 with Update 1**, and is ideal for compressing any boot disk that you use to run Windows, such as limited storage Tablet PCs.

Superb Compression — Maximum Reliability

If you are looking for **the best compression to double your boot disk capacity**, DoubleSpace's proven WIMBoot technology is the answer. Your disk will grow to 200% of its capacity, on average. You will also be able to recompress your disk as you add more data to it in the future.

Ground Breaking Innovations

ZIPmagic DoubleSpace easily achieves compression ratios of 2.0:1 on your boot disk. Disk compression takes advantage of all your available CPU cores, for the least possible Windows downtime during processing.

- ▶ **Adjustable Compression** — *Four settings, MaxSpeed through MaxSpace*
ZIPmagic DoubleSpace works as fast as possible at the *MaxSpeed* setting, or compresses your data as good as possible at the **MaxSpace** setting.
- ▶ **Undo Disk** — *Ensure data integrity*
ZIPmagic DoubleSpace can optionally use an Undo Disk while compressing your disk, protecting you against accidental data loss in the event of a power failure.
- ▶ **Automated Processing** — *One-click operation*
ZIPmagic DoubleSpace needs exclusive access to your Windows boot disk. It sets everything up and reboots your computer for you, so you can sit back and relax.
- ▶ **Recompression** — *Periodically re-use for maximum space savings*
As you add and delete files from your boot disk, periodically run ZIPmagic DoubleSpace again to recompress your data and free up even more space.
- ▶ **SSD Bundles** — *Designed for all Solid State Disk hardware*
Cost per gigabyte on SSD drives is still prohibitive compared to mechanical disks. Bundle ZIPmagic DoubleSpace with your SSD hardware to reduce cost per GB.

ZIPmagic is the inventor of transparent, full disk compression for Microsoft Windows, and the primary innovator in the data compression industry. For more information, and a free unrestricted 30 day trial download, please visit www.zipmagic.co.
