

Instantly Boost  
Storage Space

No Noticeable  
Performance Impact

Supports RAID Setups

Works on SSD and  
Mechanical Drives

Attains the Best  
Possible Compression

Based on Data  
Deduplication

Preserves System  
Security on All Files

Transparently Access  
all Apps and Data

Multi-Threaded and  
Load-Balanced

Safe and Reversible  
Compression

"While the pre-compression estimate showed a potential space savings of about 19GB, I ended up saving about 43GB.

I am delighted with the results...we have gone from having 18% free space, which is potentially problematic, to over 37%, which is comfortable."

Jeffrey A. Mirus, Ph.D.

# ZIPmagic Stacker

*Deduplicate Your Data!  
Ideal for Storage Drives,  
All Non-Boot Disks.*

ZIPmagic Stacker **doubles or triples your disk capacity with zero downtime**. Access to compressed data is completely transparent – all of your installed applications run normally, and all of your files remain fully accessible as if they were not compressed at all. **Stacker runs on 64 bit Windows 8 and Windows 8.1, does not require Windows to be rebooted**, and is ideal for compressing any storage disk that is not used to boot Windows.

- SAFE
- FAST
- MULTI-CORE
- FOR DATA DISKS

## ***The Best Compression — Without Compromise***

When you must have simply the best compression, you cannot beat the compression savings afforded by **Stacker's data deduplication technology**. Stacker **eliminates redundancies across files**, sometimes even compressing data that would be typically considered incompressible.

## ***Ground Breaking Innovations***

ZIPmagic Stacker achieves compression ratios that are extremely high without sacrificing performance or stability. A typical virtual machine farm compresses near a ratio of 4.0:0.

- ▶ **One-Click Operation** — *Compress or decompress drives in a single click*  
ZIPmagic Stacker automatically enables and disables data deduplication on your drive at the single click of a button.
- ▶ **Compress** — *Eliminate redundancies across files*  
ZIPmagic Stacker eliminates repeated patterns across your entire disk, without stopping at file boundaries – thus achieving the highest compression rates.
- ▶ **Optimize** — *Keep your disk in top shape*  
As you add and remove files from your disk, or make changes to existing files, ZIPmagic Stacker recalibrates compression to maximize your space savings.
- ▶ **Check Integrity** — *Verify stored data*  
ZIPmagic Stacker ensures your data is safe through its built-in data verification functionality, ensuring space savings don't come at a price.
- ▶ **Uncompress** — *Any time you may need to*  
ZIPmagic Stacker offers a built-in decompression option for when you need to support down-level platforms. Just make sure there's enough free space!

**ZIPmagic** is the inventor of transparent, full disk compression for Microsoft Windows, and the primary innovator in the data compression industry. For more information, and a free unrestricted 30 day trial download, please visit [www.zipmagic.co](http://www.zipmagic.co).
