To ALL Leaders of South America and the United States of America

I know that you realize all the people leaving South America and coming into the United States have a much larger problem than simply finding jobs, which are indeed needed, for these millions of people. The main problem lies in the fact that these people see no future for themselves or their children. They are running scared with no where to find what they are really needing, which is education in leadership; education that will give each person the ability to solve the problems in their own country, instead of running away from those problems.

Education in leadership is what the Peaceful Solution Character Education Incorporated is offering you at this time for the millions of people who are wanting to leave their country. If this problem is solved, the children who have left, and those desiring to leave, will have the ability to face the problems in their country and even solve those problems peacefully. This would make their own country a perfect place to stay and a perfect place for family life.

We Can Solve Your Problems

The *Peaceful Solution Character Education Program* was designed to make leaders out of every family member, equipping each person with the correct moral leadership to solve problems as they arise in their family and community. It even helps them to foresee problems that have not yet arisen and to solve them before they start disturbing their environment, whether at home, on the job, or in the community.

If you will work with us to implement the *Peaceful Solution Character Education Program* into the lives of the children who have already left South America and are now in the United States, it will equip them with the educational skills they need to start solving the problems in their country, as well as in the United States.

In recognizing the urgent need to help, along with the great dangers facing the many children who have recently come across the borders from Central America, **we would like to help**. We understand our United States Government Representatives are working hard to address the dilemma of returning the children to their homelands, but everyone knows this will not solve the problems facing that country and those children. We would like to offer a solution to solving the total problem facing our nations.

This Is Our Proposal

We would like to send our representatives to speak with you to show you what the *Peaceful Solution Character Education Program* is, what it can do, what it has done, and how it can solve the problems facing both countries, making South America a desirable place to stay, not a place the people want to leave.

The *Peaceful Solution Character Education Program* is a sure way of bringing peace and cooperation between the United States and our southwest neighbors. We are offering to share this way with you at this time. The goal of the *Peaceful Solution Character Education Program* is to train all people to see and understand the basic moral values in life, such as honesty, respect, the importance of asking, and self-control. These are just a few of the basics taught in our easy-to-learn curricula. Regardless of religion, nationality, age, gender or monetary status, morality is needed in all walks of life.

Although these children are facing uncertainties, we see this as a great opportunity to educate them in ways to create a better environment, not only for themselves, but for all of their fellow countrymen. Knowing that our children today will be our leaders tomorrow makes this a wonderful opportunity to advance the process of promoting peace between our countries.

The Peaceful Solution Character Education Incorporated has been promoting peace globally for many years. We have been recognized as a 501 c3 since November 2001. We presently teach classes in over 16 different countries. During the 2013-14 school year we were able to present these basic principles to over 35,000 students in the United States alone. All of this is done at no cost to the students or school districts.

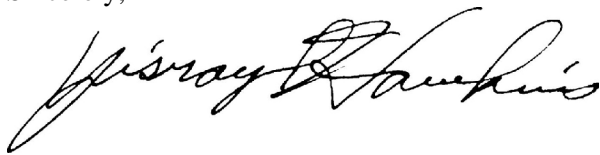

Therefore, we would like to assist in this matter as well. We ask to be granted access to between 300-400 of the children to enroll them in a 30-day character education program. In this way, we can train 400 students per month. With the training they will receive, they will be able to return to their country and train the leaders and school teachers of their communities. By training 400 of them each month and then introducing them back into their country, they can start immediately training others in the *Peaceful Solution Character Education Program*, which can make a positive impact in their communities. In this way, the *Peaceful Solution Character Education Program* will soon spread to everyone. The benefits are enormous. Peaceful interactions, job security, cooperation and friendship, which assures safety, are just a few of those benefits.

We have been granted access to a facility to accommodate a group this size, and we have acquired commitments from our instructors to ensure the program's effectiveness. Girls and boys will be kept in separate quarters. They will train for the full 30 days, 7 days each week, 8-10 hours a day.

We know there are no quick fixes. But we also know, this program works fast. People begin see benefits immediately. Training in this program is the most important thing that could be done for those children. It would create a wonderful friendship that would continue for generations to come.

During the 30 day training period, we would like to work with the educational ministers in the children's native country to show them what the *Peaceful Solution Character Education Program* will do for these children, and what the children will then be able to do for their countries upon returning home. We also welcome the children's parents to come visit their children while they are in school training. We also request to work with the teachers of both countries, periodically, offering refresher courses. This will keep all teachers in agreement and all students in unity.

Sincerely,
