On Demand K12 Gateway allows your district to:
- Enable data once trapped in paper to become usable.
- Enable audits of document compliance.
- Enable custom retention policies for district, state and federal regulations.
- Manage parent messaging regarding document compliance and school communication.
- Intelligent Document technology allowing documents to automatically be sorted, stored, and permissioned with no user intervention.

Tie up all your loose ends through innovative processes for records collection, distribution, presentation and archiving. The only electronic records solution your district will ever need.

Why On Demand K12 Gateway™?

On Demand K12 Gateway, the pinnacle of Student Relationship Management Solutions is comprised of the following:

Intelligent Document Distributor™

Transform risky warehouses and filled file cabinets to living, breathing, on demand and accessible records.

Advanced Security Controller™

Automated Access and Permission management roles based on record type. Automated record processing leaving little room for human error.

Policy and Compliance Monitor™

User Configurable Retention, Archiving and Reporting schedules. Establish both Retention and Archiving schedules from 1 to more than 100 years at the click of a button.

ParentShare Engagement Module™

Automatically delivering and archiving student communications including report cards and progress reports thereby eliminating the manual processes used today. ParentShare increases parent/student/district interaction all the while saving valuable costs and resources.
