## About Cali Bamboo

Headquartered in San Diego, Cali Bamboo manufactures green building materials made primarily of bamboo, one of the world's most durable, sustainable and renewable materials. Founded in 2004, the company has become a model for how individuals, businesses and communities can implement modern design while maintaining structural strength and environmental integrity.

## Mission

Cali Bamboo's mission is to promote the use of bamboo as a new material for everyday products. It is our hope, that by providing alternative products made from renewable resources, we can make a difference in the future of our planet.

## *Giving Back*

Cali Bamboo was founded on the concept of giving back to the planet, and the organizations that are actively protecting it. Not only do they provide products that are environmentally responsible, they volunteer and donate to national and local non-profits that are seeking to make a difference in our world.

Cali Bamboo is an annual sponsor of Surfrider's Paddle for Clean Water

## *Why Bamboo?*

---

### **Rapidly Renewable**

Bamboo is clocked as the fastest growing plant on Earth, and can be continuously re-harvested every 3 - 5 years, without damaging the plant or surrounding ecosystem. This puts less demand on old growth forests, maintaining them for future generations.

### **Strength & Durability**

In structural engineering tests, bamboo has a higher tensile strength than many alloys of steel, and a higher compressive strength than many mixtures of concrete. Cali Bamboo's Fossilized® proprietary manufacturing process yields the worlds hardest floors.

*Chrissy and Blue*

*Homeowner*

*Reno, Nevada*

“ We love our bamboo floors, they’re very strong. They’re beautiful, and we’ve had no problems with them. We absolutely love them. ”

“ It worked great, had everything we needed, and allowed us to do custom cuts, curved corners, and even implement water features and lighting into the decking. ”

*Fountain Valley, California*

# Bamboo Flooring

Typically, trees used in conventional wood flooring take 30-50 years to regenerate to their full mass. The removal of these trees causes negative environmental effects on both a local and global basis. Bamboo can be continuously re-harvested every 5 years for flooring, without causing damage to the plant system and surrounding environment. Cali Bamboo Flooring is also the healthy choice for consumers. Cali Bamboo never adds Urea Formaldehyde to its glues and tests well below E1 environmental emissions standards.

## Strength & Durability

*Structural engineering tests bamboo to have higher tensile strength than many alloys of steel and higher compressive strength than many mixtures of concrete.*

## Fast Regeneration

*The fast growing, rapidly renewable material can be unobtrusively harvested every 5-7 years.*

## Breathe Easy

*Cali Bamboo flooring is 100% formaldehyde free with ASTM Laboratory test results lower than 0.000 PPM, making them safe for even the most sensitive homeowners.*

# The World's Hardest Floors

## Fossilized® Strand Bamboo Flooring

Not all bamboo flooring is created equal. Cali Bamboo flooring undergoes a proprietary manufacturing process that makes Fossilized® strand woven twice the density of any other hardwood floor in the world with a score of more than 5000+ on the Janka hardness test. Cali Bamboo offers a large variety of hand scraped, distressed and antique floors backed by an industry-leading 50-year residential warranty.

# Reclaimed Oak Flooring

Made in the USA and sustainably sourced from post-industrial revolution barns, factories, and mills, this solid oak flooring retains unique characteristics only made possible by its previous life of service in America's heartlands. Knots, cracks, saw marks and nail holes show the history of the wood and allude to the laboring hands that worked with each plank many decades past.

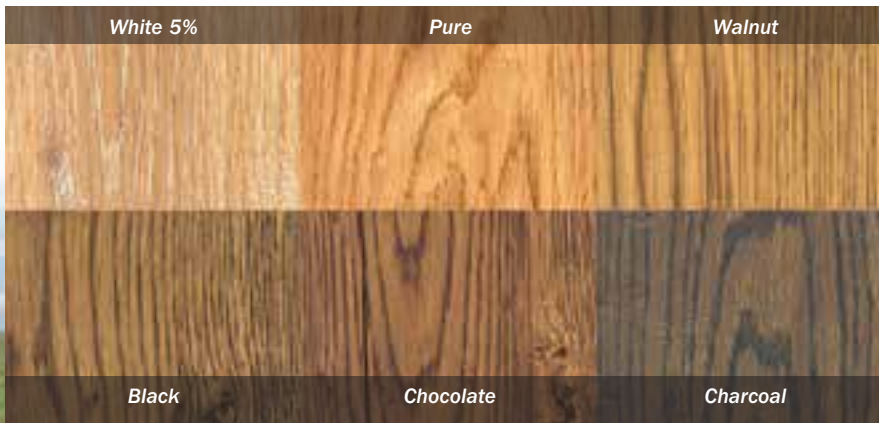

## Made in USA

All products and materials crafted right here in the U.S.

## Reclaimed

Cali Bamboo gives a second life to these charming materials.

Remilled Solid Oak with Pure Oil Finish

## Fossilized® Eucalyptus Flooring

Fossilized® Eucalyptus has the appearance of an exotic or reclaimed hardwood. It also has all of the green benefits of rapidly renewable material reaching full mass every 14 years. Backed by a 50 year residential warranty, this beautiful, durable and environmentally responsible floor features an easy click-lock installation system.

- Rapidly Renewable Hardwood
- Durable, Pet & High Heel Friendly Flooring
- Natural Termite & Insect Repellent Properties
- Easy glue-less Click-Lock installation

### Unique & Versatile

Bold wood grains with Janka hardness over 3500 lbs. easy glueless click-lock installation.

## GreenClaimed® Cork Flooring

Ideal for moisture prone areas of the home, these plank and tile floors feature Ceramic Shield Technology™, significantly reducing the appearance of scratches and scuff marks. These characteristics make cork flooring an amazing alternative to traditional hardwood.

- Soft and comfortable
- Sound and temperature insulating
- Naturally mold and water resistant
- 42.8% pre-consumer recycled content

### Sustainable

Cali Bamboo uses natural and replenishable materials ensuring our global usage will never outpace supply.

### Recycled

Making products out of recycled materials means less waste in the landfills and a greener tomorrow.

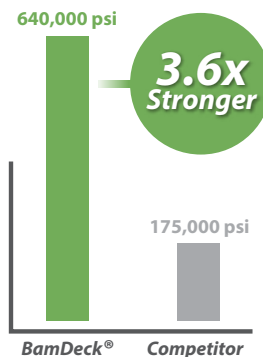

# Composite Decking

Enhance your outdoor living space with the ultimate in composite decking. Requiring no painting or staining, wood plastic composites are quickly becoming the premier choice for low maintenance, worry free deck building materials. Not to mention BamDeck® Composite has more than 3X the strength of other composites. The combination of ultra strong bamboo fibers and long lasting durable plastics gave rise to the development of CoreMax Technology™ which increases tensile strength by 35% while reducing weight by 20%.

## Wide Plank Decking

### World's First **Wide** Composite Decking

Redefining the look of composite decking, each wide deck flooring board is 50% wider opening up a range of new design possibilities.

- Increased tensile strength by 35%
- Reduced weight by 20%
- Created with reclaimed materials from making other bamboo products
- Faster Installation Time

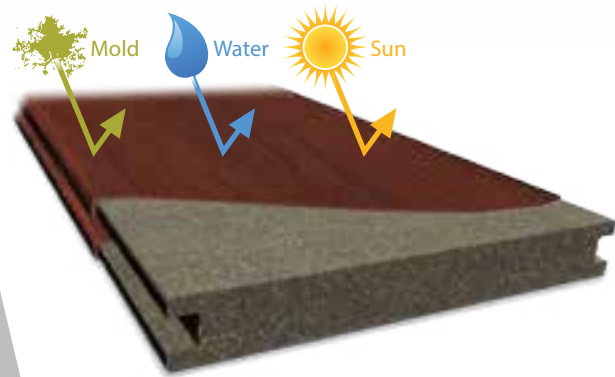

## Infinity® Composite Decking

Infinity® Composite Decking is manufactured in the United States and made from 100% post-consumer recycled materials. With a 50/50 mixture of reclaimed oak/maple hardwoods from the furniture industry and recycled HDPE plastics from milk jugs and detergent bottles, Infinity® Composite is the eco-friendly decking choice. Featuring InfinityShield™ protection and TrueOrganics™ Wood Grain, this 16' composite decking will put an exclamation mark on your outdoor living space.

Beautiful, eco-friendly, Made in America and backed by a 25-year residential warranty...that's the Infinity™ promise.

**Made in USA**  
Leading the way in American Eco-Friendly Decking, all products and materials crafted right here in the U.S.

**100% Recycled**  
Making products out of recycled materials means less waste in the landfills and a greener tomorrow.

# Bamboo Plywood

## Furniture Grade Bamboo Plywood and Veneers

Cali Bamboo plywood is manufactured from 4-6 year old organically-grown moss bamboo - always the perfect color, density and strength. Rectangular strips are cut from the bamboo and then boiled to remove sugars. Only the highest quality strips are selected for manufacturing our plywood.

## Bamboo Poles

Bring a natural and tropical design element to your outdoor structures. Cali Bamboo poles are beautiful, durable and easy to build with. Moso Bamboo Poles are available in a variety of sizes, up to 8 feet long and 4 inches in diameter.

## GreenClaimed<sup>®</sup> Cork Wall Tiles

Designer Cork Tiles bring the raw beauty of the forest to interior design. Easy-to-apply wall panels are layered with the bark of the cork oak tree and enhance décor organically with earth tone hues and natural textures.

## Bamboo Slats

Tropical decor products bring an island vibe to any interior. Create a bold wall covering or ceiling design using natural bamboo slats that are sustainably harvested and easy to install.

## Palm Thatch

Palm Thatch makes a great topper for all island structures including tiki bars and huts. Palm Thatch is the natural way to keep structures cool and dry in any weather.
