

AUTOMATED SHELL SIDE CLEANING

“

This equipment operates in the most difficult conditions predominantly on petrochemical refineries running consecutive shift patterns on time driven critical projects and performs consistently to a high standard without failure.

BUNDLE BLASTER

DURABLE • POWERFUL • AFFORDABLE
Shell Side Waterblasting System

- **Automated rail system with remote control box**
Meet “hands free” operational requirements by eliminating manual shotgunning.
- **Adjustable stroke length**
Match the stroke length to each tube bundle with simple auto-stops for efficient cleaning with no wasted time.
- **Pneumatic or hydraulic packages**
Handle working pressures up to 40k psi with flow capacity up to 110 gpm.
- **Optional bundle rollers**
Rotate tube bundle for thorough coverage.
Optimally cleaned tube bundles are more productive when put back into service.
- **Adjustable “A” frames with locking caster wheels and anchor hooks**
Easy maneuverability and stable, secure positioning at job site.
4.5 ft. of height adjustment to fine tune jet distance and maximize cleaning power.

OVERVIEW:

- **Pressure** Up to 40k psi (2800 bar)
- **Rotation Speed** 50-1000 rpm
- **Linear Speed** 7-40 ft/min - (2.1-12 m/min)
- **Power Supply** Air or Hydraulic
- **Rail Length** 24 ft (7.3 m) and 36 ft (11 m)
*Custom lengths available
