

Clearly the Best Motorcycle Audio System

No Batteries Required

A fully integrated music and communications system for your motorcycle, the MC-200 system has sound quality you have to hear to believe.

We've added both new and popular concepts, redesigned and improved, to the MC-200 system, like prioritization, automatic volume adjustment, direct iPhone® interface with voice commands, isolated inputs and connection for your blue tooth devices, including the newer BMW audio devices.

Smaller in size, the MC-200 preserves real estate on your bike. A new cable harness keeps connection points easily accessible for adding or changing audio devices, and you can remove the display while riding.

With fully integrated audio, you can listen to music and talk to other riders, or a passenger at the same time. Hands free, full duplex intercom allows normal conversations, even at highway speeds. You even choose how much music fades while talking.

The FM radio now has both U.S. and European formats with familiar search, seek and save station presets. Tune the system to your tastes with bass, treble, balance, loudness and fade adjustments, then save settings and restore them at any time. Rider/Passenger volume level adjustment are refined to keep you both happy.

Whether you enjoy music while riding or just need clear, instant and reliable communications, MotoChello has you covered.

System Features

- ◆ **Touch Screen Display** with back lit button panel can be removed while riding
- ◆ **Adjustable screen brightness** for changing light conditions
- ◆ **Audio Unit** is smaller with quick connect cable harness for easy access
- ◆ **FM/Weather Band Radio** with U.S and Euro station formats and save to presets
- ◆ **iPhone® Interface**—Use phone and voice commands through the MC-200 system
- ◆ **GPS Interface** designed for the Garmin zūmo
- ◆ **Multiple Music Sources**—iPod®, CD, GPS, Satellite radio, Phone, Radar detector (*or other audio device*) play simultaneously
- ◆ **Automatic Volume** adjusts to external conditions from your selected level
- ◆ **Prioritization** when using several devices at the same time
- ◆ **Full Duplex Intercom** for normal conversations at any speed without “cutting out”
- ◆ **Two-Way Radio Interface** with supplied FRS/CB connection cables. Adapters available for specialty radios.
- ◆ **Blue Tooth devices** connect with our BTA Adapter, including BMW audio system devices
- ◆ **30-day Money Back Guarantee**

Rain resistant display case
is powder coated

Display: 2.5" x 3.625" x .875"

Audio: 2.75" x 5.125" x .75"

Included with MC-200 System

The MC-200 is complete with everything you need to install and operate the system.

- ◆ Audio control unit
- ◆ Removable, touch screen display unit
- ◆ RAM ball mount for display
