Entrada and athenahealth Explore Workflow Efficiencies and Productivity Gains at Cardiology Associates of Central Connecticut

ENTRADA'S MOBILE DOCUMENTATION SOLUTION ENABLED CARDIOLOGY ASSOCIATES OF CENTRAL CONNECTICUT TO DOCUMENT MORE EFFICIENTLY, CREATE DETAILED CLINICAL NOTES, AND CLOSE ENCOUNTERS FASTER

NASHVILLE, Tenn., August 12th, 2014 - [Entrada](#) has announced Cardiology Associates of Central Connecticut (CACC) as its most recent addition to its series of client success stories, teaming with [athenahealth](#) to complete a testimonial video featuring several cardiologists utilizing both systems. Cardiology Associates of Central Connecticut is a recognized leader in cardiac care and is nationally accredited for its testing labs. While transitioning from paper records to an electronic health record (EHR) system, the physicians at CACC knew they needed a workflow solution that would enable its cardiologists to continue dictating detailed patient notes and would integrate seamlessly with the athenaCollector® practice management service and athenaClinicals® EHR.

"I believe that the combination of athenahealth and the Entrada (mobile) application has really helped us," stated Dr. Robert J. Golub, Cardiologist at Cardiology Associates of Central Connecticut. *"Our goal in using these tools is to keep things simple and take care of our patients, and at the moment that is what we are accomplishing."*

During the transition from paper to an electronic health record system, the physicians at [Cardiology Associates of Central Connecticut](#) wanted to maintain a high quality of care provided to their patients, in the midst of adopting new technology. Entrada's mobile documentation application with athenaClinicals and athenaCollector provided the cardiologists at CACC the mobility and flexibility they had been searching for, enabling them to maintain a personal connection with patients even while documenting detailed portions of the patient note.

"We've been able to maintain a dictated note, which also means when I see the patient the next time and I open up their previous note, I can read my thoughts and see them in a narrative form and get the content I need to see," noted Dr. George Spivack, Cardiologist at Cardiology Associates of Central Connecticut.

Cardiology Associates of Central Connecticut chose athenahealth's cloud-based system and Entrada's mobile documentation application to create an efficient and productivity boosting workflow for its busy cardiologists. Entrada has enabled the physicians at CACC to document more efficiently, create more detailed patient notes, and close encounters at a quicker rate - enabling them to maximize time spent with their patients while improving their work-life balance.
