HOW TO CHOOSE A SAW BLADE THAT MAKES THE CUT

"Saw Blades 101" Guide Available on Rockler.com

MEDINA, MN (Aug. 12, 2014) - From kerf width to tooth grind, woodworkers and do-it-yourselfers face a potentially bewildering array of options when selecting a saw blade.

To help them navigate the choices and understand the variables that affect cut quality, Rockler has created an article titled "Saw Blades 101" for the How-to section of Rockler.com. The article (available at www.rockler.com/how-to/blades-101) explains the basics of saw-blade anatomy, discusses differences in blade types and provides a list of questions that woodworkers can answer to focus their search for the best blade for their shop and situation.

"We're always surprised to find that some woodworkers use the same blade on their table saw as on their miter saw and don't realize that they could be getting better results," said Scott Ekman, Rockler's vice president of marketing and e-commerce.

For instance, they might not consider that the relatively small number and aggressive hook angle of teeth on a blade designed for ripping solid wood will almost certainly produce rough, ragged edges if used to cut melamine. Or that a regular miter saw blade, whose teeth also are set at an aggressive hook angle, might "climb" the workpiece if used in a sliding miter saw.

"If we can help walk them through the different types of blades, they'll be in a better position to choose the best solution for their individual needs," Ekman said. "We see providing informative, useful how-to content as another way we can serve our customers and contribute to their success."

"Saw Blades 101," as well as two shorter accompanying articles that focus on choosing blades for table saws and miter saws (www.rockler.com/how-to/buying-table-blade/ and www.rockler.com/how-to/buying-miter-blade/), is part of Rockler's ongoing effort to provide practical tips on tools, supplies and techniques related to woodworking and other DIY subjects.

ABOUT ROCKLER WOODWORKING AND HARDWARE

Celebrating its 60th year as a family-run business, Rockler Woodworking and Hardware is the nation's premier supplier of specialty hardware, tools, lumber and other high quality woodworking and do-it-yourself products. Rockler has 29 retail locations in AZ, CA, CO, GA, IL, IN, MA, ME, MI, MN, MO, NH, NY, OH, OR, PA, TX, WA, and WI, as well as extensive catalog and internet operations.

To learn more about Rockler, please visit <u>www.rockler.com</u> or call 1-877-ROCKLER.
