**IntelliView**™

Track Controlled Substances

- Track Location
- Monitor usage
- Track Expiration Dates
- Monitor Temperature
- Track access to cabinets
- Detect Tamper

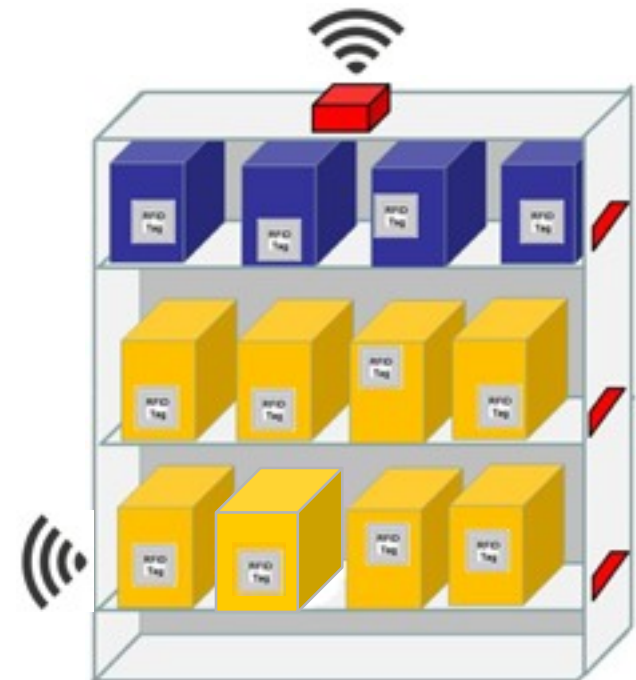

IntelliShelf™

- How does it work?
 - Place the tagged asset or supplies on the shelf and our technology will automatically detect that inventory has been added or consumed
 - System can provide immediate notification when critical assets or supplies such as drugs or high value equipment are removed or consumed

Update & Send alert

IntelliView™

Track Assets on Google Maps

- Use inventory data to locate last known position
- Import floor plan drawing into the software to show more intuitive location data on equipment
- Use mobile reader to search for missing assets on location

IntelliView™

Mobile at the Station

- Take inventory in seconds
- Read hundreds of tags by pointing the reader
- Use reader to check out assets or supplies
- Use mobile reader to move or relocate inventory

Mobile in the field

- Use your Android smart phone to check out equipment in the field
- Transactions are processed in real time

IntelliVan™

- How does it work?
 - Readers are installed in the vehicle and interfaced to the Android Smart Phone
 - Assets contain RFID tags that are instantly detected and read by the readers mounted inside the vehicle
 - Drivers poll the system prior to leaving the site to ensure all assets and equipment are accounted for
