

Iris Data Services Launches Reporting and Administrative Enhancements to Iris Arc

Kansas City, August 18, 2014 — Iris Data Services, the leader in eDiscovery managed services, today updated Iris Arc with new tools to predict and manage eDiscovery budgets. Iris Arc provides law firms and corporations with a private Relativity environment for a fixed monthly fee.

“With this new release, Iris Arc gives our clients an even greater ability to manage their budgets,” said Major Baisden, President of Iris. “For example, the new reports let law firms and corporations easily manage storage allocation on an individual matter basis. That’s huge for our clients.”

“The demand we are seeing for Iris Arc is incredible,” said Damon Goduto, Co-Founder and Senior Vice President of Sales for Iris, “in part because of the easy entry-point for Relativity that Arc offers. In the last two weeks alone, Iris has signed three multi-year managed services contracts for Iris Arc with two Am Law 100 firms and one Fortune 500 Corporation.”

Greater predictability with Iris Arc helps law firms and corporations reduce their legal spend while providing higher quality results to their clients. Department heads at law firms and corporations also get better forecasting and reporting abilities, allowing them to effectively manage their resources and staff.
