

# For a Smarter and Safer Oil Change

Protect your Engine and our Planet.

**SMART-O®**  
THE INTELLIGENT DRAIN PLUG

SMART-O is more than a innovative oil drain (sump) plug. Moreover it is a safety system for the engine, the customer, your business and the environment. Through a patented sealing and retention mechanism it offers a significant improvement in sealing performance, product range and marketability.

## ○ Safe-sealing function:

Highly robust O-ring material expands on contact with oil to prevent oil leakage from inside the pan.

## ○ Anti-vibration function:

O-ring also acts as an interference to prevent natural self-loosening of plug, caused by engine vibration.

## ○ Engine + oil pan protection:

Protects the thread of the oil pan by eliminating need for excessive torque. Reduces risk of sudden oil loss which could lead to a costly engine damage.

## ○ Environmental protection:

Reduces risk for oil leaks into the environment, safe for re-use, Cr6 free and RoHS. An ideal product for a green oil change.

## ○ Faster installation - more efficiency:

A unique headmarking system and part finder system speeds up the plug selection process. The special torque specification allows the application of simple unified settings to speed up installation.

## ○ Business Risk reduction:

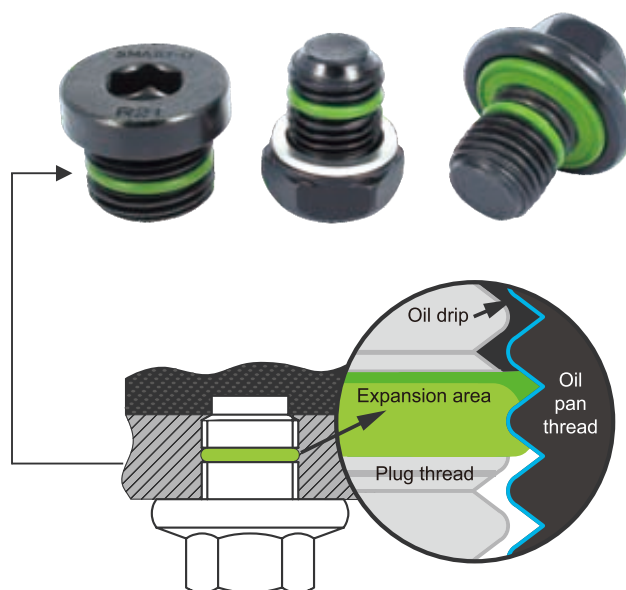

Reduces the risk of customer claims due to negligent installation and damaged parts.

## ○ Lower inventory cost:

Overlapping plug types have been consolidated to reduce SKUs while maintaining coverage for the same amount of vehicles.

## ○ Power-Promotions!

Powerful packaging, POS, posters, training and other promotional materials for effective communication with dealers, service operators and end-users.
