

Genius Scan+ by The Grizzly Labs Turns Mobile Devices into Scanners

Now Available for Intel® Atom™ Tablets for Android*

The replication of important documentation is no longer reliant on expensive, stationary desktop equipment. Genius Scan+ by The Grizzly Labs allows tablets users to conveniently scan, share and store their paperwork right on their powerful mobile devices.

10 million users already employ this revolutionary app that produces high-quality scans with border detection, perspective correction and enhancement for black and white or color images. Creating both JPG and PDF format, the app can upload users' important data directly to cloud services like Evernote* or Dropbox* with the tap of a finger. Exporting to any platform that supports these types of files is simple. A multi-page feature allows fast firing off of several pages and documents are produced on the device itself, not a third party server, so they are secure.

Android* Tablet Users Can Scan, Share and Store Their Information Anytime

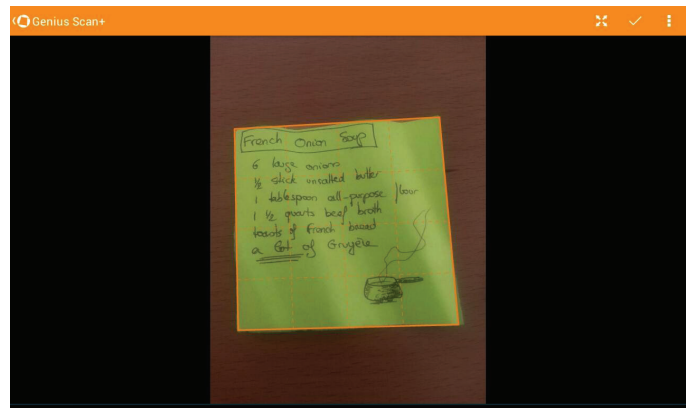

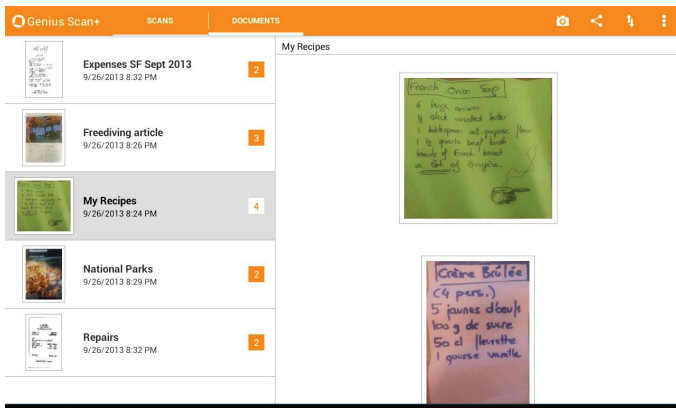

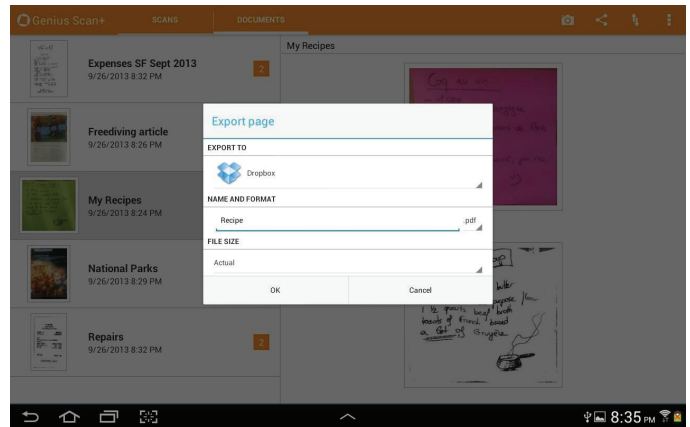

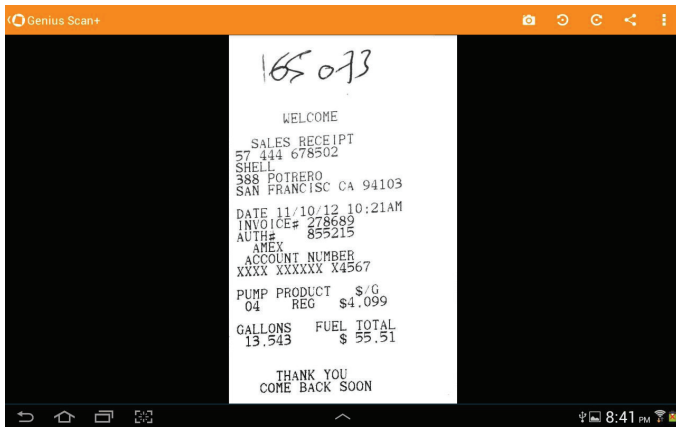

The obvious advantage for working people is the easy management and utility of their paperwork while they are on the go. The refined, user-friendly interface is simple to operate on the responsive, high-definition screen. Versatility and security keeps all documentation in one, highly portable place and affords paperless duplication, sharing and archiving. As more people transition into mobile office environments, Genius Scan+ is fast becoming an instrumental workplace tool.

Features of Genius Scan+ for Intel Atom Tablets for Android*
