home healthcare software

no internet? no problem.

Announcing: Igea Point of Care Offline

Igea Software continues to make it easier to provide quality care. With the new iPOC® Offline, clinicians can access Igea Point of Care with no connection to the internet. Using the same workflow as Igea Point of Care, clinicians will need no additional training as the software seamlessly alternates between iPOC® Offline and iPOC® Online based on the level of internet connection.
Key Benefits:

- Complete patient visits using a phone or tablet without internet connectivity

- Ensure standardization and consistency of patient care across the agency

- Optimize clinician performance through streamlined workflow

Ready to work, wherever the road takes you

Tailored to meet the needs of on-the-go clinicians, iPOC® Offline delivers an experience that's simple, intuitive and engaging for users while providing billers with accurate information and owners the data they need to manage their business. The new product augments Igea HHC by offering immediate access to critical clinician forms -including Oasis and 485- without the need to have an internet connection.

Leading the way in home healthcare software since 2003

iPOC® Offline

Available for download in July 2014 through myigea.com, the new product is only accessible to authorized users from agencies that subscribe to iPOC® Offline. Upon entering a valid user name and password, iPOC® Offline downloads the user's agency-specific version with all customized forms and unique agency customizations.

Minimum System Requirements:

Software: Android 4.1

Hardware: 16GB of Storage, 1 GB RAM

Data Usage: 2 GB per month*

Recommended System Requirements:

Software: Android 4.4

Hardware: 16GB of Storage, 1 GB RAM

Data Usage: 3 GB per month*

Key Benefits:

- Automatically syncs with Igea HHC when internet connection is detected

- Design mimics iPOC® Online flow and interaction

- Seamlessly alternates between iPOC® Offline and iPOC® Online as the connection is found or lost

- Fully integrated with Igea HHC

- HIPAA compliant through robust data encryption

- Information is automatically saved as the clinician types

*Data Usage if connected by 3G/4G connection 100% of the time when the user comes online. The data usage is dependent on the amount of forms, visits and patients being added, updated and deleted by the user. The minimum requirements is based on a caregiver doing 160 visits/month and adding/updating 300 forms/month
