Certified Aviation Services Appoints Mike Turpin As New General Manager

Ontario, CA (PRWeb) Aug 25, 2014 -- Certified Aviation Services, LLC (www.certifiedaviation.com) proudly announces the appointment of Michael Turpin to its newly created position of General Manager, effective immediately. Mr. Turpin will lead Certified Aviation Services (CAS) overall growth in the MRO Line Maintenance Services sector as well as expanding its AOG Repair / Modification group-GoTeam.

Mr. Turpin Joins CAS from his most recent position as Senior Project Manager at Source One Aircraft Repair where he oversaw large scale repair and modification projects for domestic and international operators. Mr. Turpin will add to CAS' MRO expertise by bringing in more than 14 years of MRO Technical Leadership and Customer Service Management experience that includes previous maintenance management roles for Polar Air Cargo and World Airways as well as serving on McDonnell Douglas' Recovery and Modification Services team.

Brad Caban, President of Aeromark, LLC said, "The CAS team is excited to introduce Mike Turpin and the capabilities he has to our customers. Mike brings with him experience as an operator, OEM and a MRO provider, i.e. the trifecta of aircraft maintenance knowledge. Mike's ability to quickly ascertain a situation and come up with results will continue to push CAS into a best-in-class position in Line Maintenance and Aircraft Repair and Modifications.

About Certified Aviation Services

CAS (An Aeromark Company) is a Nationwide Line Maintenance Support Services provider that offers a broad range of innovative line services that includes complex on-wing modifications, line maintenance, gas path engine washing, and aircraft exterior cleaning services. CAS' comprehensive FAA/EASA 145 Repair Station Certificate and D100 FAA Authorization allows it to perform modification and heavy maintenance throughout the US and abroad. CAS' unique approach of partnering with large domestic and international carriers allows it to deliver flexible and superior quality line services, while improving operational efficiency and reducing maintenance costs for all customers.
