SIGVARIS' Luxury Line of Compression Socks, SEA ISLAND COTTON, Now Available in Stronger Compression Level

SIGVARIS is committed to creating the most luxurious compression socks and hosiery on the market. Now, the SEA ISLAND COTTON Socks are available in 20-30mmHg.

PEACHTREE CITY, GA (September 2, 2014) – Last year, SIGVARIS took graduated compression innovation to a whole new level with the launch of a luxurious line of graduated compression socks with natural fibers. SIGVARIS is pleased to announce that the SEA ISLAND COTTON Socks are joining the SIGVARIS MEDICAL collection for those who need a stronger compression level, giving more people the comfort of natural cotton fibers.

“When people step into the SEA ISLAND COTTON Socks, they are surprised to find socks as soft as the finest cashmere,” says Clay Walker, marketing manager for SIGVARIS North America. “This soft feel, matched with incredible durability, has quickly become a favorite among those men and women who wear graduated compression daily for leg health, prevention and medical needs.”

SIGVARIS SEA ISLAND COTTON Socks are available in navy, brown and black in 15-20mmHg and 20-30mmHg compression levels for both men and women.

Socks and hosiery that feature graduated compression are designed to be tightest at the ankle and decrease in pressure going up the legs. Graduated Compression garments help improve circulation and revive tired, achy legs. They also help with the treatment and prevention of varicose veins. SIGVARIS offers three categories of products: SIGVARIS MEDICAL, SIGVARIS WELL BEING and SIGVARIS SPORTS.
