Heavy duty non-corrosive stainless steel braided hoses "pigtailed" are included and connect regulators to cylinders*

OPTIONAL BUILT-IN FIREWALL IS DESIGNED TO SEPARATE CYLINDERS WHILE ON THE CART

Heavy duty oxyacetylene cylinder brackets are easily adjusted to accommodate all sizes of cylinders*

Rollin' ROUGHNECK™

The Uniweld Rollin' Roughneck protects and organizes your valuable torch equipment. The A-Style utilizes the safest gas mixing system ever developed, "the tip mix". This three-seated tip allows the gases to be mixed in the tip; not in the head or tube. Tip mix is the industry standard for safety.

Solid steel hinged cabinet protects outfit components from theft and damage while allowing quick and easy access to torch equipment.

Cabinet door has a locking latch that will accommodate a heavy duty lock to prevent unauthorized use of equipment.

See-thru grates provide an excellent view of regulators gauges but still provide a rugged defense against damage.

Regulators are connected to cylinder utilizing a heavy duty manifold system.

Heavy duty Uniweld flashback arrestors are added to the torch for maximum system safety

Cabinet inventory system allows for quick check of all equipment
