ENTERPRISE GRADE

Video Conferencing That's Out of the Box and Into the Cloud!

You no longer need to invest in an expensive telepresence system to have a high-quality video conference with your team, customers or partners. SimpleSignal, together with Polycom has eliminated the complexity and expense of multi-point video conferencing so you can simply dial into a video bridge whenever and wherever you want from your video desk phone, mobile device, computer browser or telepresence system.

SimpleMeetup Video is Different

While it may appear that there are many hosted video conferencing options on the market, only SimpleMeetup provides a true device and network-agnostic cloud solution. Our cross-platform compatibility allows you to employ enterprise-grade video conferencing regardless of your existing telepresence system, PBX, phone equipment and mobile devices! And unlike competitors who only provide video conferencing, SimpleSignal is a tried and proven voice, video and unified communications service provider, with a comprehensive suite of integrated UC features and world class customer support. SimpleMeetup Video is part of a full suite of SimpleMeetup collaboration tools from SimpleSignal including HD audio conferencing and desktop sharing/web video conferencing.
