

MobRadio Invites the World to Enjoy Brazilian Radio on Android* Tablets

Enabled for Intel® Atom™ Tablets for Android*

Brazil is internationally regarded as a major producer of innovative culture. The world is always waiting with baited breath to see what extraordinary new form will emerge from the Brazilian scene. Successful optimization with Intel® Atom™ tablets for Android* now lets users access the amazing broadcasts pouring out of Brazil all in one, simple application.

Designed to facilitate the tremendous content Brazil has to offer, the MobRadio app condenses and delivers all the great radio stations' so that listeners can take their favorites with them wherever they go. Now, radio is longer limited by bandwidth or terrestrial transmission. This app lets users search by genre or subject and keep track of their favorite programs. Enhancing the listening experience further, MobRadio provides album cover art, photos, social interactivity and promotions so that audiences can stay informed about their favorite artists.

MobRadio now available on Intel Atom Tablets for Android*

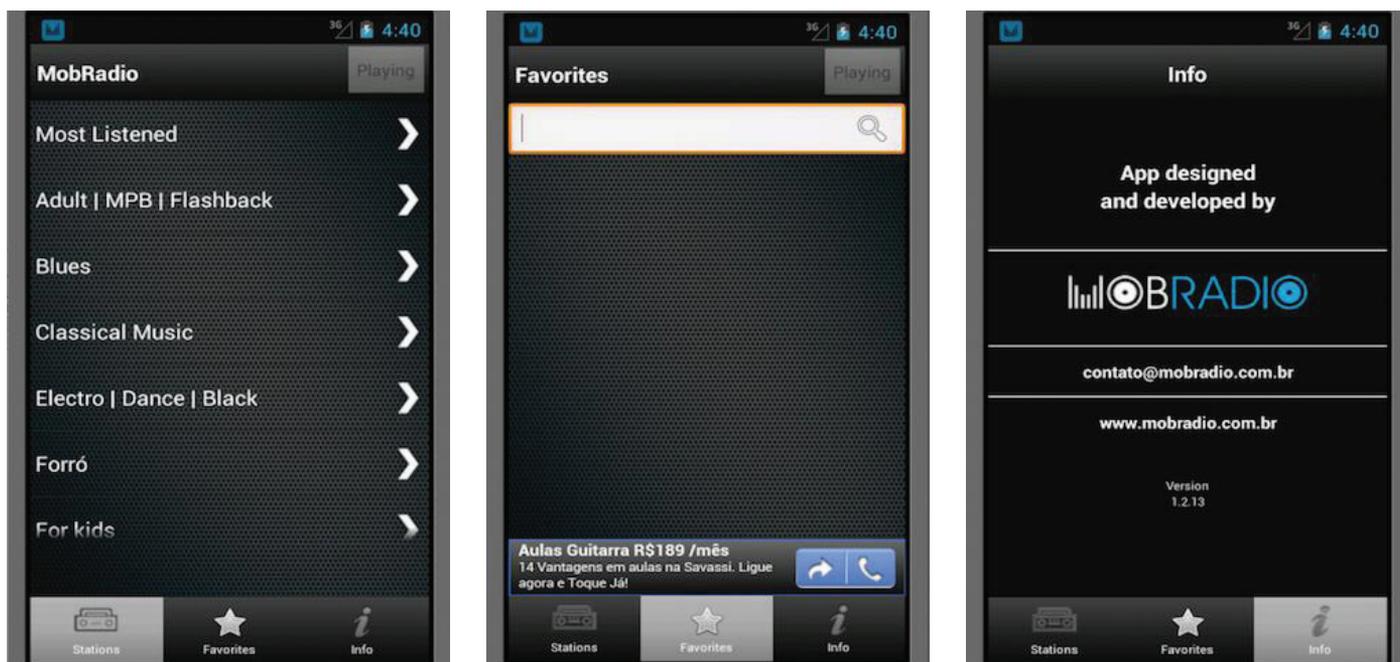

With over 1 million users, the MobRadio app eliminates the constraints of traditional radio so that anywhere there is an Internet connection, listeners can enjoy their favorite shows. High-resolution screens and sensitive touch capabilities offer crisp imagery and easy navigation so discovering new programming is effortless and fun.

Android* tablets powered by Intel® Atom™ processors provide a solid level of performance so that listeners can absorb hours of reliable functionality. By downloading the app onto their lightweight tablets, users can bring high-quality sounds and images of Brazil right onto their high-resolution screens.
