

# Cloud Hosted Message Broadcast

Reach numerous people without losing that human touch thanks to this easy to use product!

AireBroadcast is perfect for:

- Alerts
- Updates
- Automated Surveys
- Marketing & Promotions
- Political Campaigns & Polling
- Church & School Announcements
- Customer & Employee Notifications
- Reverse 911 & Emergency Messaging

The applications are endless.

AireBroadcast is a cloud-hosted outbound messaging platform that makes high output automated message broadcasting simple. All you need to do is load up a recorded message and a contact list, and AireBroadcast takes care of the rest. Plus 1 call forwarding can be set up to instantly connect interested customers with live agents. With user-friendly tools to manage multiple simultaneous campaigns and view reports in real-time, you have the flexibility to adjust ongoing campaigns as necessary.

AireBroadcast is a product of AireSpring, the award-winning #1 provider of wholesale and enterprise level short duration voice calling in the US, processing over 10 billion calls per year. AireBroadcast is a single vendor solution, meaning that there is only one bill and one relationship to manage. AireBroadcast can be deployed either as a standalone service or alongside the AireContact cloud-based contact center platform to leverage AireContact's robust dialer features. A national footprint, first-class customer service, and the best pricing in the industry combine to deliver an unbeatable experience.

## The AireBroadcast Advantage

- Most aggressive pricing on simple rate per minute plans with larger bundles available
- No long term contracts
- National coverage across the US with international destinations available
- Available as a standalone solution or as part of the AireContact cloud-based contact center platform
- One point of contact with 24x7 customer support
