Robust Data Management for Small Business

Compatible with:

Windows Mobile®

iPhone®

Advantages:

- DataPilot Universal PRO is the definitive cell phone synchronization solution to your company's cell phone management: Use with Bluetooth enabled phones
- Includes 10 phone connectors, 1 iPod cable, and one Bluetooth adapter (over \$270 savings in cable purchases)
- Instant web update online for the latest phones supported
- Backup, edit, and sync cell phone contents and schedules
- Transfer data and charge your cell phone and iPod battery at the same time
- Stay connected to the internet anywhere
- Compatible with Windows® XP, Windows Vista, Windows 7, and Mac® OS
- Import/Export all or selected data content

Highlights:

- Backup and protect business content of company mobile phones on your company computer for safe keeping before it's too late! Just in case of lost, damaged, change of employees status or in phone service carrier
- Keep all mobile phone phonebooks in sync with your Outlook, Outlook Express, Palm Desktop contacts, and gmail
- Keep associates updated on business schedule with easy sync of cell phone calendar to company Outlook or iCal appointments
- Edit your cell phone address book and calendar by connecting the phone to your computer and use the keyboard for more efficient data input

Universal Pro Cable System

Contains 10 phone connectors, 1 iPod cable, and one Bluetooth adapter (over \$270 savings in cable purchases)

Ever lost company mobile phones? How did you retrieve all the information? Backup your data!

Don't like wires? If you have Bluetooth enabled phones and computers you can connect wirelessly!

Wonder how your phones are being used? Analyze a snapshot of the phone activity volume.

Changing phones? No problem. Safely transfer and backup old to new business phones in seconds!
