The Builders Association of the Twin Cities has contracted with Keystone Report, a local research firm, to maintain a database with information about new residential construction permits around the metropolitan area. After a builder has picked up the permit from a city, Keystone Report compiles and updates weekly residential housing permits by city for 70 percent of the metropolitan-area municipalities in the greater 13-county region. Planned units are the total number of housing units planned to be built under the permits issued (one permits is issued per building which may include more than one housing unit). Permit value does not include the land/lot costs.
