

BILLIONAIRE.

- CHALLENGES YOU TO BE THE RICHEST PERSON ON EARTH -

Do you have what it takes to beat the world wealthiest figures?

JAKARTA-INDONESIA, September 25, 2014

Alegrium, an independent mobile gaming developer behind the Icon Pop series (Icon Pop Quiz, Icon Pop Song, Icon Pop Brand, etc), has released a brand new app in the App Store, with a fresh new concept for casual strategy gaming.

BILLIONAIRE. is unlike any other, it combines various elements of virtual business development strategy and fuse them into a simple yet addictive game mechanics.

You will start with \$1000 capital to start a business, just pick your favorite from the business shop, and you are good to go. Things will get interesting once you earn some profit - Do you want to invest on a new business? Or maybe expanding your current business?

As you build and earn more, a threat is coming closer to your door - based on your threat level, the authority will make you pay for penalty, stay in prison for a period of time, or seizure of your business. This is the ultimate test for your management skill - Do you want to sell the risky business? Or maybe invest on a non profit organization as a decoy?

BILLIONAIRE. also features an interesting control system called "tap to speed up." Building a business is not an instant matter, you need to be patient as the progress bar completed, thus allows you to earn money. But why wait if you have the power to speed things up? Just tap your screen continuously, and Voila, it is done!

Need more? BILLIONAIRE. have more! If you don't have the time, you can always use the magic crystal to instantly build a business. If you need extra protection from the authority, you can always use sorcery to cloak your business operation.

Now it is up to you to maximise these features using your own strategy and tactics! The goal is simple, pile up your money and progress through the game to unlock various achievement and rewards. To make it even more challenging, BILLIONAIRE. have its own leaderboard system with millions of players worldwide. Facebook connect is also available for you to compete with your friends and family.

BILLIONAIRE. is a freemium app, available in the app store for iPhone, iPod touch and iPad since September 11, 2014.
