Overview

- ✓ For more than a decade now, we – at Weblinesindia – have endeavored to deliver top notch I.T. solutions. Given our expertise in a bunch of I.T. related services, we have been frequently confronted with a variety of challenges and roadblocks. The way we successfully nullified them all speaks volumes about our acumen and self-belief.
- ✓ Our team is made up of **well trained and high qualified developers, programmers, and consultants**. They are responsible for exerting substantial efforts in order to exceed client expectations. Moreover, we also take pride in our smooth after-sale service. In summary, our decade-long existence can be encapsulated by such words as quality, passion, and customer delight.

We are transparent, fair and consistent in dealing with all people.

Our Ultramodern Infrastructure
Where Dreams Take Flight

Business Models

We have established four different service models in order to cater to projects of varying sizes, specifications, and complexity.

1

Dedicated Resource or ODC Model

Under this service arrangement, you can hire programmers or IT support, who work only for you.

2

Build Operate Transfer Model

This is an asset building model that we use to convert your outsourcing dollars into a well planned investment.

3

Fixed Cost Model

This model is ideally suited for projects with specifically defined scope and requirements.

4

Marketing Consultant – Affiliate Model

Best suited for independent marketing consultants & marketing firms, this model allows us to affiliate with individuals/organizations.

Our Progress

Weblinesindia was incorporated way back in the year 1999. The objective of launching the company was to help businesses explore the world of internet. In the last 14 years, much has changed and we have carved out a league of our own. With such virtues as knowledge, expertise and technology, we have managed to develop a major customer base in India, USA, UK and Australia.

The journey has been satisfying thus far, but we aim to go much further. The time to come shall be full of challenges and excitement.

Vision & Mission

{ Vision

“To be the most preferred I.T. Company in the world by continuously reinforcing the virtue of Customer Delight.”

{ Mission

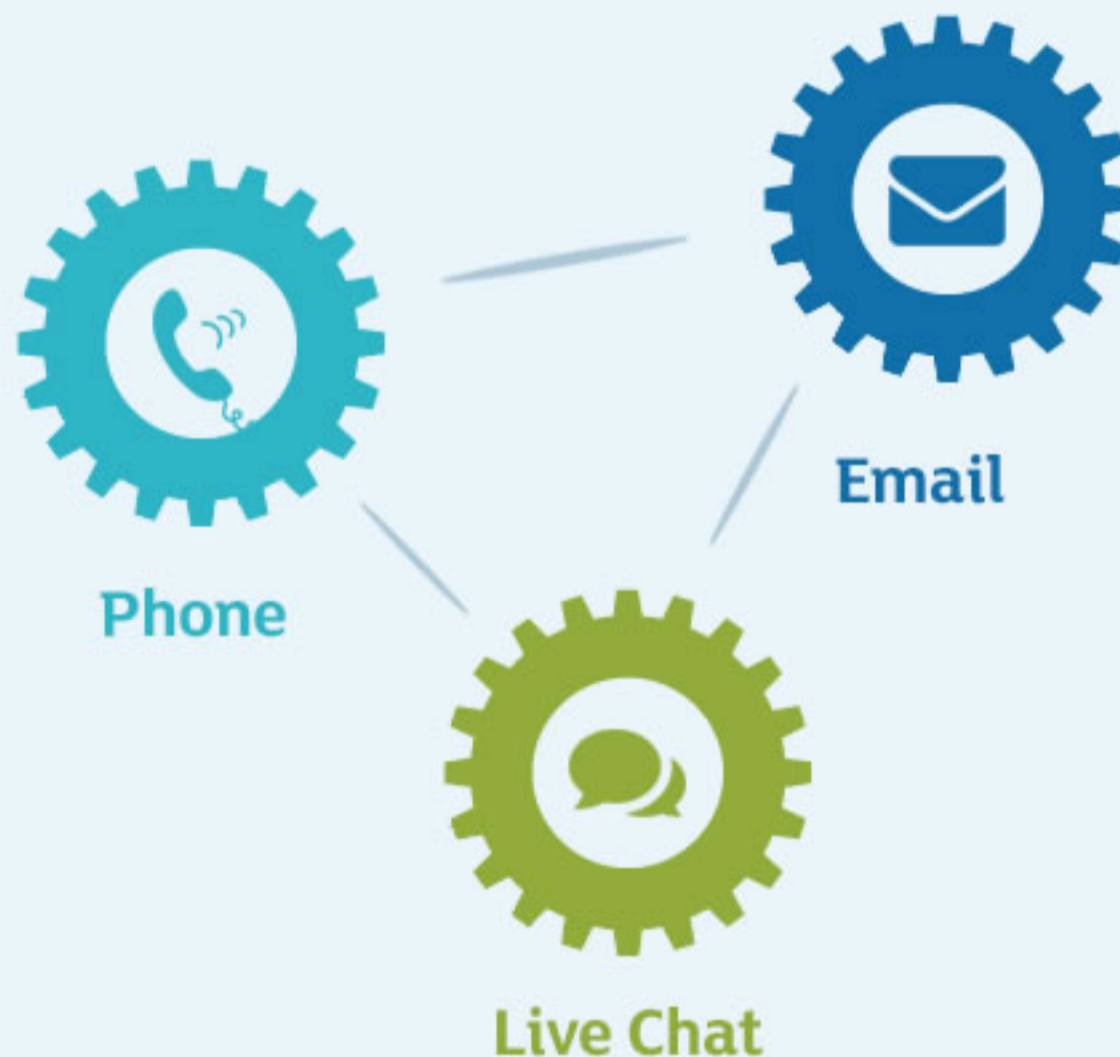

We aspire to achieve our ambitious vision by addressing some of the following issues in the short term:

- ✓ Always offer solutions that combine quality, cost effectiveness and timeliness.
- ✓ Exhibit exceptional professionalism in our demeanor.
- ✓ Hold accountability for full return on investment for the clients.

| Maintenance & Support

Our job doesn't cease at the completion of the project. We continue to support our customers in the long term. As a part of our commitment to the customers, we assist them in scrupulously maintaining their I.T. assets and infrastructure. Additionally, there is a range of other support services that we bring to the table too.
