

# SuperGNES, the Premier Super Nintendo\* Emulator

## Now Available for Intel® Atom™ Tablets for Android\*

The development team at Neutron Emulation has collaborated with Intel® to optimize its classic gaming app for Android\* tablets powered by Intel® Atom™ Processors. An expanded base of mobile device users can now enjoy a vast collection of favorite games, easily accessible at their fingertips.

With the fastest emulation and best game compatibility available, SuperGNES offers the finest in well-loved classic games to its players. Developed from the ground up in order to deliver the fastest play possible, the app quickly auto-detects games and displays cover art. Thousands of cheats, such as Pro Action Replay™ and Game Genie™ are available as players navigate through the various games. Dropbox cloud syncing supports continuous play across devices, and network multiplayer is an option using WiFi or Bluetooth. Turbo mode allows players to fast-forward games, and the advanced layout editor is available for on-screen controls.

## Vintage Favorites for Players on Android\* tablets powered by Intel® Atom™ Processors

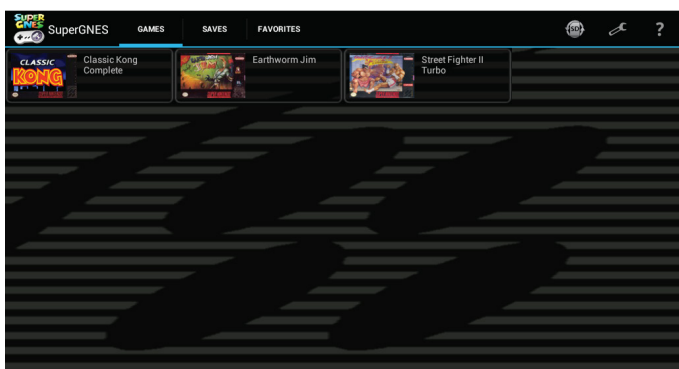

Backed by strong customer service, gamers can now enjoy classic games with modern technological advancements on Android\* tablets. They provide an ideal platform for all that SuperGNES supports, including mouse use, external controllers such as Moga/Pro, Zeemote, and iCade 8-bitty, and ultra-fast SuperFX, SA1, and DSP chipset. The flexibility and mobility of Android\* tablets allow players to thoroughly enjoy all of the features, options, and vibrant visuals available only on such a high-performing device.

## Features of SuperGNES for Intel Atom Tablets for Android\*

- In-game GameFAQs™ integration
- Support for SMC, FIG, SFC, ZIP, and 7z formats
- Ultra-fast SuperFX, SA1, and DSP chipset support
- Mouse support for games like Mario Paint
- Helpful and responsive customer service

## SuperGNES App Brings Classic Video Game Fun to Android\* Tablets Powered by Intel Atom Processors
