

Proactive Injury and Incident Prevention

Job Safety Analysis Software

Benefits for the Entire Organization

Executives

Provides a comprehensive view of JSA activity across your organization.

Safety Managers

Prevent injuries and incidents before they occur by ensuring that the correct controls are in place to mitigate potential hazards.

Supervisors and Employees

Establish and improve best practices by reviewing individual hazards and controls and by providing feedback for each JSA.

With the help of feedback from our clients, the IndustrySafe Safety Software team has developed a Job Safety Analysis (JSA) module to allow you to identify and evaluate safety hazards on a task-by-task basis.

With the JSA module, EHS managers can list appropriate controls and evaluate risks for the potential hazards accompanying each step of a task with standard or custom risk matrices.

Managers can also easily configure and edit task checklists, as well as calculate residual risks after controls have been set.

Job Safety Analysis Features

Modifiable Metrics

Use our standard risk matrix to evaluate hazards or customize it to better meet your needs or applicable regulations.

Personalized Views

View JSA dashboard panels to check your percentage of overdue JSAs, JSAs by location, JSAs by overall risk, and more.

Reports and Analysis

EHS managers can drill down to view hazards by source, department, area and more.

Notifications

Automatically alert users of JSAs and receive reminders when reviews and comments are received.

Excellent Customer Support

We offer excellent customer support services, including implementation assistance, configuration of our software, (on site and web-based) training, and real time maintenance and support.

Our Team

IndustrySafe Safety Management Software is developed by TRA, Inc., a Philadelphia based company founded in 1990. Our clients are global leaders in manufacturing, transport, construction & engineering, energy, and government.

TRA's mission is to provide the most user friendly and cost effective environmental, health and safety software for its clients. Please visit us at www.industrysafe.com.
