iMazing 1.0 - Cheat Card

What is iMazing?

iMazing is an iPhone, iPad and iPod touch manager for Mac and PC.
iMazing simplifies devices management and data transfers, and gives more control over iOS.

Who is iMazing designed for?

Every iPhone, iPad or iPod touch user.
• From the casual user searching for a simple and secure solution for managing data on iPhone
• To the power user wanting to get the most of its iOS device

What can iMazing do for you?

As a fully featured iOS device manager its possibilities are almost infinite, here are 3 typical features:

iMazing offers a 2 way simple music transfer feature:
• Just drag and drop music from any device to any iTunes library
• Transfer music from any computer to any iOS device
• No iTunes sync, no device wipe, no computer or iTunes account dependance

iMazing is a complete device backup manager:
• Allows to export current or older data sets from devices to computer
• Data includes SMS text messages, iMessages and attachments, contacts, call logs, and more
• iMazing restores any data set to any device
• Lost devices' data can be browsed and recovered in iMazing
• Cloning a device to a new one (for an upgrade to a new iPhone) is performed in a couple of simple steps

iMazing gives access to the iOS file system and all apps. File transfer becomes a simple, fast and secure operation:
• Accessing all apps though iMazing browser interface is way simpler than iTunes
• Large media files can be added to media players in seconds
• Transfers (USB or Wi-Fi) are local and secure, no cloud or third party is involved

What are the benefits over iTunes or iCloud?

iMazing is the perfect companion app for iOS devices, it complements iTunes and iCloud, iMazing:
• Performs actions that simply do not exist in iTunes (the ability to extract and transfer data and media from the device to the computer)
• Provides greater flexibility and simplicity for managing files, data and media transfers with a simple workflow and transfer wizards
• Allows to completely avoid the cloud for sensitive data transfers

Who makes iMazing?

DigiDNA has designed, developed and is maintaining iMazing. DigiDNA is known as the maker of DiskAid, which iMazing replaces. The company was founded among good friends and early adopters of Apple products, all music fans. Incorporated in 2008 Switzerland DigiDNA has an office in Western Australia.
