

goERPcloud Expands Microsoft Dynamics ERP Trials with WennSoft Partnership

goERPcloud has partnered with WennSoft to deliver two new Microsoft ERP Software trials

SAN DIEGO, CA (October 7, 2014) RoseASP, a Microsoft Dynamics ERP and CRM hosting provider, and WennSoft, an expert in field service management and project-based business processes, formed a strategic partnership to deliver cloud-based Microsoft Dynamics GP trials with [WennSoft Signature Service Management](#) and [Signature Job Cost](#) through goERPcloud, goERPcloud announced Tuesday.

The partnership represents the first time Microsoft Dynamics Independent Software Vendors (ISV) are able to deliver multiple solutions for trial through the [goERPcloud marketplace](#). goERPcloud is creating new opportunities for its partners to deliver business management software trials by creating a more agile and rich software demo program in order to help partners achieve their goals and further position themselves as top software providers within their industry verticals.

“Our solutions for Job Costing and Field Service Management greatly extend the Microsoft Dynamics GP toolset and by leveraging our partnership with goERPcloud we are able to put the software in the hands of decision makers in service based and project based organizations,” said, Kelly Dahlke, Director of Marketing. “Letting those decision makers see for themselves how our solutions can streamline their daily operations will improve their software selection process, and we are looking forward to working closely with RoseASP and goERPcloud to help improve the processes of those future customers.”

The partnership was announced at WennSoft Synergy 2014, WennSoft’s annual conference held at Hilton San Diego Bayfront. Synergy is an exclusive networking event for Microsoft Dynamics Partners and ISVs.

WennSoft specializes in developing Microsoft ERP integrated solutions for job-based industries including HVAC and Mechanical/Specialty Contracting, Fire & Security and Oil and Gas Field Services.

WennSoft Signature Service Management is a leading work order management solution that provides drag and drop functionality for easy scheduling, plus automated quoting, invoicing, revenue recognition, mapping, dispatching, field mobility and more. WennSoft Signature Service Management streamlines all processes involved in managing maintenance contracts.

WennSoft Signature Job Cost gives project-based businesses the ability to control projects with easy-to-use tools that control costs, manage labor and ultimately improve your bottom line. WennSoft Signature Job Cost lets businesses track all components of projects from subcontractors and labor to materials and equipment.

About WennSoft

Connections across the organizations are key for those who want to better manage installation, maintenance and repair processes. WennSoft delivers innovative field service solutions that streamline operations from sales to the field to accounting, arming customers with the insight they need to do their work more proactively, productively and profitably.
