

# SignEasy Announces New Security Features and Enhancements For iOS 8 App, Aims To Streamline The Way We Access and Sign Digital Paperwork

- Alumni of the Microsoft Ventures Accelerator in Bangalore, India, SignEasy is ranked among the top 10 downloaded business apps for iPhone and iPad, allowing individuals and businesses to access and securely sign and store documents.

- Recipient of the India Innovation and Technology Leadership Award by Frost and Sullivan in 2014, SignEasy is bringing a first-of-a-kind security feature by incorporating Touch ID based authentication to their electronic signature solution for iOS 8 devices: "With security as a key tenet of our electronic signature product, we are moving beyond the parameters of a four digit passcode towards the unique makeup of a fingerprint, one of the most secure authentication methods of today's online world."

- According to a CDW IT Monitor survey conducted among a thousand IT decision makers, 74% indicated that using tablet computers and smartphones led to an increase in productivity in their organization while 42% said they experienced significant cost savings.

SAN FRANCISCO, CA--(October 10, 2014): Leveraging Apple's Touch ID feature introduced for iOS8, SignEasy has integrated the new biometric authentication system that allows its customers to seamlessly and securely put their electronic signature on important documents. With passcode authentication already built into the existing app, the new user-friendly Touch ID system brings a more secure and reliable way for users to sign business and personal documents stored in their email or preferred cloud storage accounts.

"This newly integrated system builds on our already strong security commitment to our clients who view SignEasy app as an essential tool for their business," explains Founder and CEO Sunil Patro.

The company also introduced support for the document picker extension introduced in iOS 8, which allows users to import a document directly within the app from iCloud and other third party document storage apps. This feature also enables users to easily save the signed document to their preferred cloud storage accounts.

To keep up with the pace of the business world today, people are relying on their mobile devices for efficiency and productivity. Hence, flexibility and the ability to access, process and send important documents online in a secure manner on the go is a luxury that is quickly becoming a necessity. According to a recent CDW IT Monitor survey conducted among a thousand IT decision makers, 74% indicated that using tablet computers and smartphones led to an increase in productivity in their organization while 42% said they experienced significant cost savings.

Recently awarded with the India Innovation and Technology Leadership Award by Frost and Sullivan in September 2014, SignEasy brings a first-of-a-kind security feature by incorporating Touch ID based authentication to their electronic signature solution for iOS 8 devices: "With security as a key tenet of our electronic signature product, we are moving beyond the parameters of a four digit passcode towards the unique makeup of a fingerprint, one of the most secure authentication methods of today's online world." SignEasy not only increases the efficiency of daily paperwork processes, but also reassures the user of the highest level of user authentication.

These new set of iOS 8 features have been built on top the powerful mobile electronic signature suite offered by SignEasy on iOS, Android, Amazon and BlackBerry. If you want to expedite paperwork, save costs and be more productive then download SignEasy on your mobile. For a free trial, visit: <http://getsigneasy.com/download>

## About SignEasy:

Launched in 2010, SignEasy is the simplest, most convenient and secure app for businesses and professionals to sign and fill documents from smartphones and tablets. Consumers and businesses in realty, law, service, consultancy, sales and insurance use SignEasy's eSignature app to expedite business turnaround times, close more deals and reduce costs by streamlining their paperwork in business transactions.

SignEasy executes 60% faster than other leading eSignature apps and it cuts document turnaround time by as much as 95% compared to traditional methods of printing, scanning, faxing and shipping paper paperwork. SignEasy seamlessly works with Dropbox, Box, Google Drive, Evernote and OneDrive. It has been featured on Apple's App Store homepage in April 2014, selected as one of Top 10 essential business apps and consistently ranks in top 10 grossing business apps on AppStore.
