

## **Nagios World Conference 2014 Set To Kick Off**

SAINT PAUL, MN (PRWEB) – Nagios World Conference 2014 will officially begin tonight – bringing groups of Nagios users and monitoring enthusiasts together from around the globe for 4 days in St. Paul, Minnesota (USA). The conference schedule is jam-packed with presentation, support workshops, and networking events that will showcase the latest developments from Nagios Enterprises, and the knowledge of industry experts, thought leaders, IT professionals, and Open Source project leads.

The 4<sup>th</sup> annual [Nagios World Conference](#) kicks off tonight with registration and a welcome networking event to give speakers and attendees a chance to connect with like-minded IT professionals and the Nagios Enterprises staff. Tomorrow morning, Ethan Galstad, Founder and President of Nagios Enterprises, will take the stage for the opening keynote to discuss the latest developments from Nagios Enterprises, and make an exciting announcement that will disrupt the status quo in the IT monitoring industry.

Following the keynote, the presentation and workshops commence – offering attendees an invaluable amount of expertise and knowledge across numerous compelling topics. Speakers include individuals from companies of all sizes ranging from freelance IT consultants and cutting edge tech start-ups, to well known entities such as Canonical, Wireshark, NASA, Google, and Microsoft.

In addition to the over 50 presentations at this year's event, attendees will receive access to exclusive benefits such as complimentary Nagios certification testing, support and troubleshooting JumpStart sessions, exclusive product discounts, and the ability to directly influence product direction.

Conference goers as well as community members can stay informed with latest news announcements and conference coverage at [conference.nagios.com](http://conference.nagios.com) and across all popular social media avenues with the hashtag #NagiosCon14.

With multiple awards, notable users in every vertical and horizontal sector, and thousands of add-ons and extensions, Nagios is the industry standard in IT infrastructure monitoring. Nagios provides critical monitoring and alerting for networks, systems, applications, metrics, and business processes. Nagios Enterprises is the official commercial arm of Nagios and provides value-added services, products, and solutions to clients worldwide.
