

Access a Vast Ocean of Information with the MarineTraffic Application

Now Available for Intel® Atom™ Tablets for Android*

For maritime professionals, explorers and marine enthusiasts, the MarineTraffic Ship Positions app is the most popular tool for ship tracking on mobile devices. Now optimized for Intel® Atom™ processor-based Android* tablets, this remarkable app lets users track vessels all over the world in real-time.

The oceans are vast, but thanks to digital technology, anyone with an Android* tablet can view a particular ship's position, see its projected course and replay its route. Users can also see ports and updated weather information like wind speed and check estimated time of arrival and departure at over 5,000 ports worldwide.

A wealth of stunning photos and details about various vessels and fleets is accessible with the tap of a finger and users can choose from different map styles. The clean, user-friendly interface makes the MarineTraffic app a pleasure to operate.

MarineTraffic Presents a Wealth of Maritime Data to Android* Users

With over a million downloads, this app presents a host of details and up-to-date information. Users can browse over a million photos of ships, ports, lighthouses and more, all on their powerful, high-resolution screens. These responsive mobile devices offer users hours of solid performance so they can harness the valuable resources within this tremendous application.

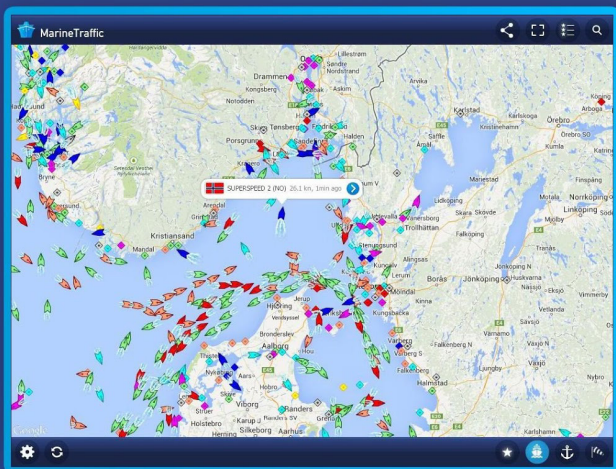

Features of Marine Traffic for Intel Atom Tablets for Android*

- Real-time Vessel Tracking
- Details about 400,000 vessels
- Route Replay
- Over One Million Photos of Ships, Ports and Lighthouses
- Updated Wind Reports and much more

Android* Brings Real-time Maritime Data into Users Hands

The Marine Traffic Application delivers a treasure trove of timely information right onto high-definition Android* screens. After easily downloading the app, adventurers, professionals and nautical enthusiasts have access to all the high seas knowledge they need.
