

Diptic Photo Collage App by UpTop Makes Photos into Art

Now Available for Intel® Atom™ Tablets for Android*

Making sharp, beautiful images into sophisticated collages is now simple with the Diptic application from UpTop. Now optimized for Intel® Atom™ tablets for Android*, this adept set of tools can edit photos and organize selections into an aesthetic theme. With a broad palette of tasteful elements that work in concert to recreate the atmosphere of place and time, Diptic offers quick, user-friendly photomontage designs that can be shared instantly with friends and family. Printed presentations, schoolwork, or simple remembrances are all achieved neatly with this one, sleek app.

With all the versatile capabilities of a photo-editing suite, this application enables users to import photos from their camera roll or from Facebook or Flickr. High-resolution, brilliant photos present a visual story when they are combined into thoughtfully executed works of art. Perfect for presentations or displays, 61 different layouts with mobile, custom borders produce polished conversation pieces for all to enjoy. Those finished collages can then be shared instantly via email or social media.

Tablet Users Create Stunning Compelling Photo Collections with Diptic

Lightweight, adaptable Android* tablets are an excellent vehicle for the Diptic photo application. Their glossy, high-definition screen display the clearest representations of time and place. Offering hours of responsive functionality, mobile device users can snap hours of pictures wherever they want to go. The sensitive touch screen allows fluid maneuverability so that arranging images is smooth and intuitive.

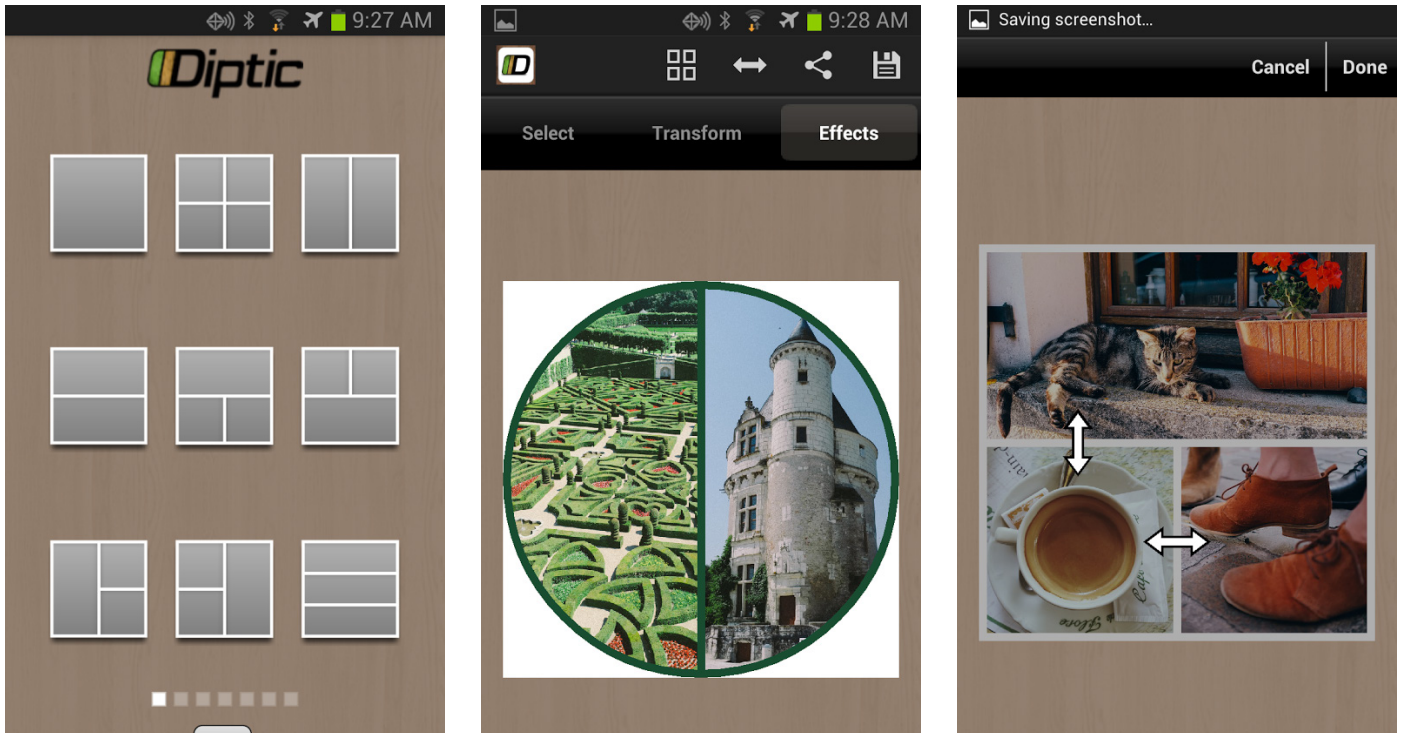

Capturing and realizing life's most meaningful moments is a breeze with the photo collage possibilities of Diptic. Users can have an ongoing visual dialog by sharing images, "rolling the dice" and returning the randomized results. Mobile devices enable the image-making fun to continue anywhere.
