

TransFirst® to Sponsor and Exhibit at iPatientCare National User Conference 2014 #NUCON2014

iPatientCare Practice Management System (PMS) has been Integrated with TransFirst to Provide Automation to Patient Payment Processing — Presenting at NUCON 2014, November 14- 16, 2014

Woodbridge, NJ, October 16, 2014 —iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR and integrated practice management solutions announced TransFirst’s participation at iPatientCare National User Conference (NUCON) 2014, exhibiting its fully integrated patient payment solution to bring automation in patient receivables.

iPatientCare is pleased to introduce the latest addition to iPatientCare PMS: Integrated Payment Processing with TransFirst. The ease and convenience of the TransFirst payment solution which serves more than 30,000 healthcare providers, enables iPatientCare’s users to process payments all in one place. It brings automation and efficiency to the provider’s patient payment process. Office staff can process patient credit card payments and credit card consent directly from the iPatientCare PMS system. It reduces front-desk clutter as there is no need for a credit card terminal and the office staff saves time in updating and balancing with all payment processing integrated into one system. In seconds payments get authorized and the patient ledger and daily payment reports get updated. This reduces the time and costs needed to collect payments and allows providers to deliver better patient care.

“TransFirst is endorsed as a member benefit provider by dozens of national, state and regional healthcare associations. We understand the specialized needs of healthcare organizations and are pleased to provide iPatientCare with a highly effective payment solution,” said Carl Mazzola, President; Health and Public Sector at TransFirst.

“iPatientCare is glad to have TransFirst as one of the Sponsors/Exhibitors at iPatientCare NUCON 2014 to highlight its fully integrated solution which brings efficiency and automation to the patient payment process,” said Vipul Patel, Senior Technology Officer at iPatientCare.
