# The reddit sync pro App Personalizes the World for Thinkers

## Now Available for Intel® Atom™ Tablets for Android*

Reddit is a fountain of information; it has gained immense popularity because there is something for everyone. Now, users can download the reddit sync pro app and customize their reddit content to read at their leisure.  Recently optimized for Intel® Atom™ tablets for Android*, the reddit sync pro app selects relevant content and makes it available right on the high-resolution screen.

Now, they can download the reddit sync pro app and select their favorite topics to read offline, whenever it is most convenient to them.  Recently optimized for Intel® Atom™ tablets for Android*, the reddit sync pro app selects the appropriate information and makes it readily available, anytime, right on the high-resolution screen.

It is simple for users to cull topical subjects or refine reddit search criteria. Featuring a user-friendly interface, reddit sync pro enables easy following of the selected information.  In addition, there are zero advertisements so content will never be disrupted.  Other features include a sidebar subreddit navigation, as well as multi-user and multireddit support.  In addition, users can remember what posts they've read with the convenient reddit gold option.
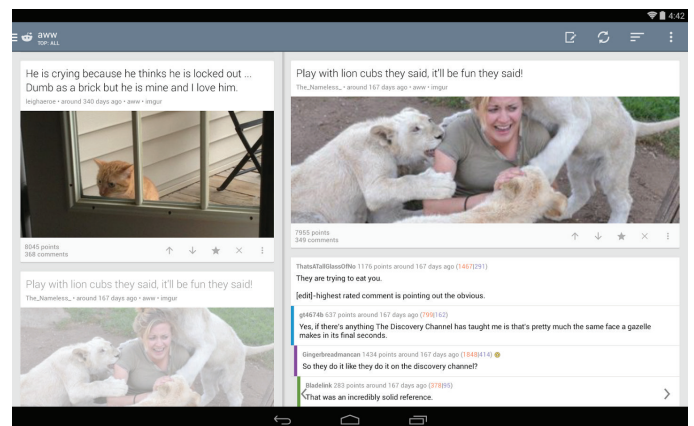

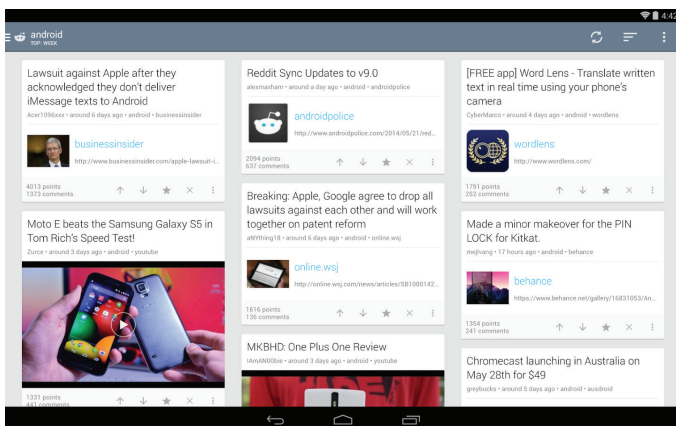

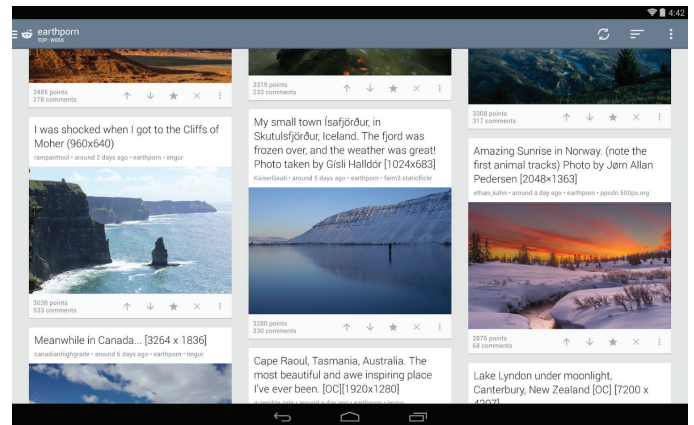

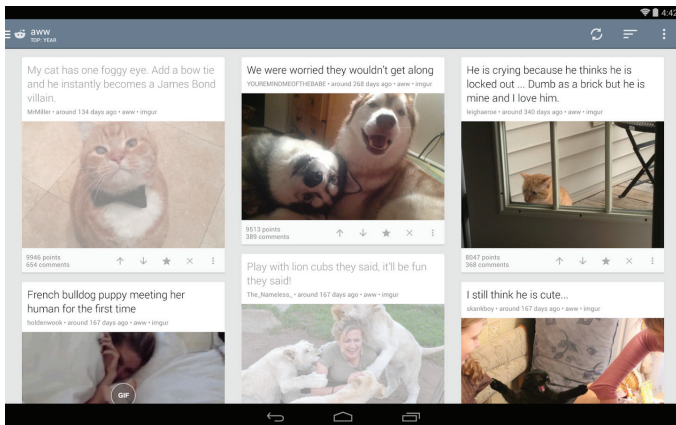

With so much great content being uploaded to reddit every day, it can be difficult to keep up or to track relevant information from reputable sources. With the reddit sync pro app, users can search and store easily, finding the content they want and reading it when they want it.
