

ANYWHERE POINT OF CARE IT'S THAT EASY

MOBILECARE™
PRO

MobileCare™ PRO is the HIPAA compliant secure mobile communications and collaboration component of AGNITY's award winning solution MobileCare™ Enterprise. MobileCare™ PRO provides your organization with the comfort that your staff is using rich and secure HIPAA compliant messaging and multimedia communications and collaboration across the diagnostic and treatment continuum for improved workflow, higher productivity, faster and more informed decisions, and better patient outcomes.

MobileCare™ PRO is easy to install and use and works on the smartphones and tablets already being used on a daily basis by your healthcare staff. This eliminates the expense, IT support and learning curve associated with adding new technology. It is available for both Cloud and Premise based deployments.

KEY FEATURES AND BENEFITS

Secure Text, Voice and Picture Messaging

Clinicians and staff can send and receive secure text messages with verification and audit trail. Pictures may be clicked from camera and sent as attachments. Voice messages may also be recorded and sent as a voice page .

Voice Calling

Voice calling option is available in response to a text or voice message when desired.

Presence/Availability/Status

Through the presence feature, users can set their status as Available, Do Not Disturb, and define how best to reach them—message or phone call, resulting in faster problem resolution and better patient outcomes.

Intelligent Routing

Automatic escalation of a text/voice message based on availability/status and presence settings.

Attachments

Clinicians can share images taken with the device in a secure HIPAA compliant fashion without the images remaining stored on the device.

Multi-device support

Support for smartphones and tablets on iOS and Android platforms, and PCs with internet access.

Web Messaging Portal/Console

Staff can use the portal on a PC with full features and functionality
