

# Web Browsing and Video Streaming In a Flash, Photon Flash Player and Browser by Appverse, Inc.

## Now Available for Intel® Atom™ Tablets for Android\*

High speed web browsing, video streaming and Flash support is now available on Intel® Atom™ tablets for Android\* with the innovative Photon Flash Player and Browser app. Its developer, Appverse, Inc. is a leader in creating mobile applications and cloud-based virtual solutions for businesses and consumers. By enabling Photon Flash Player and Browser for Android\* tablets, Appverse, Inc. now enables users to benefit from high speed Web access and streaming on a portable and versatile platform. Reviewed by over 60,000 users on Google Play, the app remains one of the most popular Flash support solutions for Android\* devices.

Designed to enable users to easily access Flash websites and video streaming, Photon Flash Player and Browser provides a high-speed alternative to traditional Web browsers. The app runs Javascript at faster speeds than other popular browsers do, plus it offers many intelligent features that make browsing swift, secure and simple.

## Appverse, Inc. Brings Photon Flash Player and Browser to a New Audience of Tablet Users

Photon Flash Player and Browser offers Android\* tablet users hours of portable Web browsing, Flash support and video streaming. As they navigate the Web in full screen mode, users can manage bookmarks and tabs by using touch commands on Android\* tablets' interactive screens. Flash videos and websites look stunning on HD displays and an elegant, user-friendly interface makes it a breeze to glide between pages, compare information and browse at length.

Offering simplified searches with a single URL bar, Photon Flash Player and Browser is easy enough for almost any user to operate. Type full addresses into the bar, or use its intelligent design to search with words and simple phrases. Then, users can even add to the experience by customizing their browsers. Customizable settings enable users to decorate their browser backgrounds by selecting from thousands of colors. Thanks to the app's high-speed and customizable settings, it is bringing a new level of accessibility and mobility to Flash support and Android\* tablet users. Once downloaded, users can enable high-speed access and streaming from virtually anywhere with an Internet connection.
