

DATASHEET

Legal Application Hosting

Top Three Features

- Migration to the Proxios Cloud
- Anytime/anywhere computing
- Comprehensive 24/7 service and support

Introduction:

Proxios Legal Application Hosting is a comprehensive and secure “IT as a Service” solution that delivers software applications in a virtual desktop environment. Proxios has proven success in partnering with law firms for efficient migration to the cloud. Clients can depend on “human-ware” 24/7 service and support, as well as other significant cloud-based services such as network management, end point protection, and unified communications. With Proxios Legal Application Hosting, firms can focus on the business at hand, instead of maintaining IT infrastructure.

How it Works:

At Proxios, each client is a priority to us. We perform a thorough review of your currently used applications in order to determine the best method of migration to the cloud. Your employees can enjoy a smooth transition with little or no training, and no other type of disruptive change.

Thanks to the hundreds of applications from numerous vendors already operating on the Proxios ITaaS platform, we have developed the expertise and relationships that are needed to move your business efficiently and reliably to the cloud. In nearly all cases, the legacy applications you already use will simply be enabled to run on the cloud in a virtual environment.

The result? Anywhere/anytime computing without having to upgrade your software or identify alternative suppliers.

Service and Support – the Human-ware Team

When it comes to ITaaS solutions, the Proxios “Human-ware” element makes the difference. Our team provides the best in service, combining skill, close familiarity with the needs of each client, and established tools and processes. Requests are resolved on a timely basis, problems are resolved at root cause, and users are always well- informed. As a Proxios Legal Application Hosting client, you will be assigned to a dedicated team that includes account management, system administrators, and IT specialists in applications and networking. We build knowledgeable, predictable, and trusting relationships with our clients – truly delivering on the concept of “IT as a Service.”

BILLING
