

workscape

“Design is not just what it looks like and feels like. Design is how it works.”

Steve Jobs

Workscope, a Pittsburgh based, woman-owned business enterprise, helps maximize an organization’s two greatest assets and cost centers: its people and its facilities. Workscope provides innovative approaches to meeting top organizational challenges like enabling collaboration, speed to market, generational overlaps on teams and branding. The thoughtful selection of office furnishings and better ways to create space that more closely match an organization’s vision are our stock in trade.

Workscope is proud to be the exclusive regional representative for two of the industry’s most highly respected thought-leaders, Knoll and DIRTT. Knoll has an unmatched history of design excellence in the office furniture world and its commitment to quality and research has kept the company relevant for over 70 years. Best known for its iconic pieces like the Barcelona chair and its affordable workstations, Knoll has built on its rich design heritage to remain a market leader in quality and innovation.

DIRTT is the largest and fastest growing pre-fabricated interior construction company in North America. In less than 10 years, DIRTT went from start-up to the dominant manufacturer by committing to and delivering on the promise that of building it better. Before DIRTT, interior construction had been largely unchanged for more than a century, remaining in the dark ages while the rest of the world embraced technological innovation. DIRTT’s groundbreaking software (based on JAVA and gamification) has enabled interior construction to be smart, green, fast and most importantly, flexible. By rethinking all that we know about construction, DIRTT now helps build spaces faster and cheaper with enhanced attributes including more daylight and better sound insulation. And the best part is, with DIRTT interior construction, an enterprise has the ability to adapt its workspaces as the business needs change and all with far less waste than was ever possible before.

Dramatic, highly functional and custom branded workspaces can be designed and built in half the time and at a lower cost than conventional construction.

Since 1996, Workscope has been providing innovative approaches to Pittsburgh's leading organizations from its showroom and Learning Center, minutes from downtown. We're proud to be pioneers in the area of speech privacy solutions, beautiful yet affordable office furniture and agile architecture in the region.

Please visit our 8,000 sf Learning Center to explore the many ways that Workscope can improve the quality of your office or institutional space.

Does your workscape reflect your vision?
