Material Concepts Now Offers DuPont™ Tyvek™ Air Cargo Covers

Material Concepts, Inc., an authorized DuPont™ Tyvek® Master Distributor, now offers DuPont™ Tyvek™ Air Cargo Covers for sale. These Air Cargo Covers made with Tyvek® are used to cover pallets of pharmaceuticals, perishables and other temperature-sensitive products during air transit.

Philadelphia, PA, November 17, 2014 – Material Concepts, Inc. announces the availability of DuPont™ Tyvek™ Air Cargo Covers. Material Concepts is an authorized DuPont™ Tyvek® Master distributor and a leading supplier of Air Cargo Covers made with Tyvek® in North America. DuPont™ Tyvek™ Air Cargo Covers (<http://www.materialconcepts.com/products/tyvek/air-cargo-covers/>) are used to protect pallets of pharmaceuticals, perishables and other temperature-sensitive products during air transit.

These new products from DuPont™ are specifically engineered to address the threat of cold chain breaks during air transit, when pharmaceuticals, perishables and other temperature-sensitive products are at the greatest risk for temperature excursions. The high reflectivity attribute of Tyvek® provides excellent temperature protection from solar radiation, the leading cause of upward temperature excursions, and extreme ambient temperatures (hot or cold). The breathability of Tyvek® can prevent condensation damage, while the physical barrier protects products from rain, snow, and dirt during outdoor exposure.

DuPont™ Tyvek™ Air Cargo Covers are available in two types: one piece (top cover only) or two pieces (top cover and bottom cover). Standard stock covers are available.

“DuPont™ Tyvek™ Air Cargo Covers are available for sale now from Material Concepts.” said Doug Kohn, Material Concepts’ Vice President, Sales & Marketing. “Just call us toll free 800-372-3366 to order.”

For air shipment of **pharmaceutical** products, DuPont™ Tyvek™ Air Cargo Covers can provide hours of protection from extended cold chain breaks, are ideal for Control Room Temperature (CRT) products, and have been validated by pharmaceutical manufacturers for use in European Union (EU) Good Distribution Practices (GDP) applications.

For **perishables** like fruits, vegetables and flowers, the breathable cover with high reflectivity protects against multiple threats, including temperature excursion, pest infestation, excess moisture damage, rain and environmental contaminants.

About Material Concepts

Material Concepts is an authorized Master Distributor of DuPont™ Tyvek® (<http://www.materialconcepts.com/products/tyvek/>) and authors the highly popular Tyvek® Innovative Uses Blog (<http://tyvek-blog.materialconcepts.com/>) with regular posts about new and inventive ways that people are using Tyvek®. Material Concepts is also a leading paper converter, a supplier of consumables for sewn products manufacturers, importers and the fashion industry, and offers one-stop sourcing for CAD/CAM cutting and design supplies.
