FOR IMMEDIATE RELEASE

Strainert Introduces New, On Demand, Force Sensor Calibration Certificate Service to Review and Download Reports Completed After October 1, 2014

Strainert provides a new, on demand, calibration certificate online service for force sensors calibrated after October 1, 2014. Providing customers on demand access to this important calibration information when and where they need it will enhance their ability to complete their work more quickly and efficiently.

The service also eliminates delays related to the loss of their original paper certificate and having to wait to receive a replacement. To register and get started using the calibration certificate service, visit <http://www.strainert.com/services/online-calibration-certificate-lookup-tool/>

Strainert's calibration facilities enable Strainert to certify all their manufactured force sensor products at their manufacturing site up to a 500,000 pound capacity. All Strainert force calibrations are traceable to the National Institute of Standards and Technology (NIST) and are performed by a highly-trained and experienced staff in a controlled environment.

All of Strainert's standard calibration procedures result in calibration certificate reports that include the product model and serial number, rated capacity, test load(s) applied, output sensitivity recorded at each test load, and a statement certifying traceability of the measurements.

These reports are only available to the customer who owns the force sensor the calibration was completed on. "The goal is to provide customers secure on demand access to their calibration information when and where they need it."

Please [contact Strainert](#) to find out more about this new calibration certificate service.

About Strainert Company

Headquartered in Conshohocken, PA and established over five decades ago, Strainert is an industry leading designer and manufacturer of force sensors products, including load cells, load pins, tension links, force sensing bolts/studs and force measurement systems. Strainert is a pioneer in the force sensor industry, with numerous patented designs made possible by innovative internal gaging processes and an unsurpassed dedication to engineering, customer requirements and vast industry experience in the Aerospace, Military, Marine and Automotive industries. Strainert is AS9100C / ISO 9001:2008 certified. For more information, please visit <http://www.strainert.com> or call 610-825-3310.
