ASTRO File Manager with Cloud by Metago

Smart Devices have opened the door of access for users, but now that individuals have the option to store all types of content in many places, connecting devices and finding the right file can pose a problem.

The ASTRO File Manager with Cloud solves the problem by providing users with some clever, next-level search and organization tools. Freshly optimized for Android* tablets with Inte^{I®} Atom[™] processors, this application acts as a hub with innovative searchabilty and indexing. So regardless of the size, format or location of the files, users can seek out, move and open their desired content with the tap of a finger. ASTRO supports Leef Bridge*, a unique USB flash drive that enables one click file transfer to phones, tablets or desktops.

Additionally, ASTRO indexes files as users browse their directories to expedite future searches and the Task Killer Tool shuts off processes in order to save battery life. Accessing files from Facebook*, Google Drive*, DropBox*, Box* and other cloud-based services is simple and intuitive. The app also supports multiple languages so users all over the world can utilize this versatile tool.

ASTRO File Manager with Cloud Expands Capability on Android* Tablets

Android* tablet users already know the lightweight, powerful utility of their devices and now with the ASTRO app, they can gain more control and organization over their documents, attachments, photos and videos, no matter where they are stored. This one simple app opens the door to personal content, consolidating and optimizing it wherever they are, right on their tablet screens.

Features of ASTRO File Manager with Cloud for Intel Atom Processor-based Android* Tablets

- Innovative Search Engine
- Supports Leef Bridge and Micro USB Flash Drives
- Access to Cloud-based Storage
- App Backup Tool
- Indexing for Efficient Searches

Easier, Quicker Access with ASTRO File Manager with Cloud on Android*

Users can find that obscure file, organize their media and consolidate all their content with this elegant, fast solution. By downloading the ASTRO File Manager with Cloud to their powerful Android* tablets, users can easily move or copy files from one device to another. Effective, user-friendly access with technologically advanced searching and organization, all right on their tablets.
