Innovative software that motivates patients to accept and schedule treatment

Out of sight, out of mind

Patients typically remember only 50% of what you recommended. And that's on their way out the door.

When patients forget your recommendations, they postpone or even ignore treatment. That costs you money.

Getting patients to not only remember, but to act promptly on your treatment plan can significantly improve patient health and increase practice revenue.

Visual images are the most effective call to action for your patients to get the dental care they need.

MouthWatch Connect shows patients what you said — anytime, anywhere

- ✓ Increase case acceptance with a visual call to action after your patient has left the office
- ✓ Motivate patient action with images, x-rays and explanations to help them visualize, understand and act on your recommended treatment plan
- ✓ Share images, recommendations and reminders with patients wherever they happen to be via HIPAA-compliant web and mobile apps
- ✓ Encourage patients and their families to send smartphone images of concerns, so you can advise them when an office visit is required
- ✓ Empower patients to improve their home care and hygiene routine

introductory special **\$49**/mo

Share with patients and professionals

- ✓ Share images, videos, x-rays, treatment notes and more
- ✓ Securely exchange treatment information with your network of specialists
- ✓ Encrypted communications and controlled access helps you comply with the latest HIPAA and privacy regulations
- ✓ Unlimited sharing with all of your patients and professional network for one low monthly fee

Connect is accessible via our desktop app, web browser and iOS and Android devices

Features and Benefits

- ▶ Reach every patient in the practice for one low price
- ▶ Add notes and instructions to specific images, videos or x-rays
- ▶ Securely communicate with patients and professionals across all platforms
- ▶ Easily integrate the MouthWatch Intraoral Camera for chairside or patient use
- ▶ Personalize patient care and treatment reminders
- ▶ Customize your professional profile to highlight practice details
- ▶ Generate word of mouth marketing for your practice
