Supreme Energy Expands Footprint in Florida with Key Natural Gas Acquisition

Orange, N.J. – December 1, 2014 – Supreme Energy, Inc. (Supreme Energy), announced today that it has entered into an agreement purchase Southern State Gas, LLC (Southern State) for an undisclosed sum. Under the terms of the agreement, Supreme Energy will acquire Southern State’s entire account base of natural gas customers, many of whom are within the TECO Peoples Gas utility service territory.

Supreme Energy is authorized by the Fla. Public Service Commission to supply natural gas to commercial businesses and institutions as these property owners have a choice in who supplies their gas. Supreme Energy offers products and services not available through the utility which is an advantage to consumers. It allows them to better manage energy expenses and often save on monthly energy bills. This acquisition enlarges Supreme Energy’s Fla. operations and is a win for commercial consumers. With a larger pool of customers, Supreme Energy is able to better leverage its size and offer attractive pricing plans and contract options for those looking to choose a natural gas supplier.

“We are extremely excited to bring the Supreme Energy experience to more commercial customers in the Sunshine State.” said Deborah Fineman, President of Supreme Energy. “Businesses and institutions such as restaurants, schools, and factories know they can save on their natural gas bill by choosing a supplier such as Supreme Energy. We look forward to delivering competitive rates, unique product offerings, and unparalleled customer service to all of new and existing customers.”
