

Insight Reporting

Executives Need Accurate Reporting

When **INSIGHT Reporting** pulls data directly from all the casino's systems, it keeps all your data updated and accurate. Instead of reporting data to spreadsheets and reporting manually, **Insight Reporting** tells you exactly what you want to know, when you need to know it.

Executives Want To Save Time

Between the automatic alerts, pre-built analysis, and analytics that **Insight Reporting** provides, executives spend far less time gathering and analyzing data, and more time using it to make accurate and informed decisions.

Executives Need To See The Entire Organization

Marketing statistics, slot/player analysis, operational metrics, food & beverage information - it is all in one place where executives can see it in conjunction with all the data from the CMS, Kiosks, and Payroll. And if the executives need to know more about a key player, they can drill into any data source to get all the details they need without leaving **Insight Reporting's** dashboard technology.

Insight Reporting is the top choice Business Intelligence tool for gaming executives

With **Insight Reporting**, executives are able to manage data from all their systems, including multiple sites and departments - in one easy to use interface.

Using **Insight Reporting** results in more accurate information, customizable, in one place, whenever you need it.
