

About Us

Priasoft produces software that help companies migrate an existing Microsoft Exchange deployment to another Microsoft Exchange environment, either due to an upgrade or other event such as a merger, acquisition, divestiture, or data consolidation.

Key Benefits

- Simple tools that handle complex problems
- Simple deployment
- Full coverage: Mailboxes, Public Folders, Outlook Clients, Distribution Lists, Contacts, Rules, Out-of-Office, Delegates, and more.
- Extremely fast and easy to scale
- Exclusive Feature: Dry-Run
- Built-in safety and security

Industry Recognition

Priasoft is a Gold Certified MS partner and 3 time winner of Readers Choice from MExchange.org.

When faced with the challenge to migrate, companies want tools that help manage risk, control project timelines, and have minimal to zero end user impact.

What's the Priasoftware Difference?

We've put over 14 years of experience "in-the-box" to cover EVERY migration scenario. Priasoftware excels in product functionality, usability, performance, and stability because we've developed the most advanced platform in the business:

One product supports all Exchange to Exchange scenarios – including O365 allowing you to leverage a single solution for all your upgrade and consolidation projects

Our code is our code – no reliance on 3rd party or Microsoft Native tools allowing Unmatched Speed, Dry-Run, Backfill, and Fault Tolerance.
